Chief Inspector's Annual Report

CHIEF INSPECTOR'S ANNUAL REPORT

To the Board of Education, Toronto :

I have the honour to present the following Report regarding the Public Schools under your charge for the year 1913 :

Appended to the Report will be found Statistical Tables, which give in detail all important particulars relating to Teachers, Pupils, Attendance, Tardiness, Studies Pursued, Cost of Maintenance, etc.

ATTENDANCE

The total number of pupils registered during the year was : In the kindergarten, 11,144 ; in the other classes, 54,659 ; total, 65,803.

The average daily attendance was: In the kindergarten, 3,817 ; in other classes, 38,559.

The average Monthly Registered Number was 51,241, (see Table A).

The average of Monthly Average Numbers was 44,711 (see Table B).

The average of Monthly Averages was .87 per cent. of the Average Monthly Registered Number.

The best average for any month in the year was 93.8 per cent., the average for September.

The largest number, 53,148 was registered in October, and the smallest number, 48,000, in June.

The following statement shows the average registered number in each School during the year :

School	Average Registered No.	No. of Rooms	Average Per Teacher
Alexauder Muir	947	18	53
Allan	111	3	37
Annette Street	991	21	47
Balmy Beach	436	9	48

ATTENDANCE IN THE VARIOUS CLASSES

The registered number in attendance during the year in the different classes was as follows:

Kindergarten	11,144
First Book	19,655
Second Book	12,889
Third Book	12,006
Fourth Book	9,347
Commercial	762

The difference in the various classes compared with last year is as follows:

Kindergarten, increase	980
First Book, increase	1,253
Second Book, increase	1,488
Third Book, increase	1,168
Fourth Book, increase	868
Fifth Book, increase	73

MEDALS AND CERTIFICATES OF HONOUR

Certificates of Honour and Medals are awarded at the Midsummer closing, to such pupils as have not been once absent or late, and whose conduct has been uniformly good.

Bronze Medals are awarded to such pupils as have conformed to the above conditions for four years.

Silver Medals are awarded to such pupils as have conformed to the above conditions for eight years, or who have passed from the Senior Fourth Book Class in less than eight years, provided they have taken their whole school course in Toronto Public Schools and have received honour certificates during each year of their course.

A Silver Clasp is given to each pupil who conforms to the above for each year over eight years.

The following statement shows the number of Medals and Certificates awarded at the Midsummer closing in the several schools :

TEACHERS

There were 1073 Teachers and 188 Kindergartners employed in the schools of Toronto during the past year in addition to the special teachers.

The following supervisors were employed: A Supervisor of Kindergartens, a Supervisor of Drawing, a Supervisor of Music, a Supervisor of Writing and Commercial Work, a Supervisor of Manual Training, a Supervisor of Domestic Science and Domestic Art, and a Supervisor of Physical Culture.

The following Assistant Supervisors were employed: One in Art, two in Music, one in Writing, and one in Physical Culture.

The following special teachers were employed: Twelve in Manual Training and twelve in Domestic Science.

The certificates of the teachers were as follows: First-class, 210; second-class, 863.

KINDERGARTENS

The certificates of the Kindergartners were as follows: Director, 177, Assistant, 11.

There were 72 Kindergartens in connection with our schools. The total number registered in the Kindergartens during the year was 11,144; the average of monthly registered numbers was 5,598, and the average of monthly average numbers was 4,178. The following table shows the registered and average attendance for each month:

	Registered Attendance	Average Attendance
January	5,447	3,963
February	4,588	3,226
March	4,852	3,238
April	5,516	3,916
May	5,540	4,103
June	5,160	3,817
September	6,005	4,826
October	6,024	4,684
November	5,946	4,531
December	5,719	4,611

The total amount paid to Kindergartners for salaries in 1913, was $104,895.40.

The total amount paid for Kindengarten supplies was $8,207.65.

The total cost for Kindergartens for salaries and supplies was $113,103.05.

The cost per pupil on the basis of total enrollment was $10.15 for salaries and supplies.

The cost per pupil on the basis of average monthly number was $20.20 for salaries and supplies.

Percentage of caretakers' salaries and fuel, say $3,400.

The cost per pupil in the Kindergarten on the basis of total enrollment was $9.84 for salaries, supplies, fuel and caretaking.

The cost per pupil in the Kindergarten on the basis of average monthly number was $19.59 for salaries, supplies, fuel and caretaking.

The attendance in the Kindergartens throughout the year was as follows :

School	Average Registered No.	Average Attendance
Alexander Muir	82	64

DEPARTMENTAL EXAMINATIONS

High School Entrance Examination

2,029 candidates wrote at the Entrance Examination in June, 1913, of whom 1,671 were from the Public Schools of Toronto ; 1,538 were granted Entrance Certificates, of whom 1,247 were from the Public Schools of this city.

The following shows the number from each school that wrote and the number that passed:

High School Entrance Examination, 1913.

THE INDUSTRIAL SCHOOLS

The attendance at the Victoria Industrial School for Boys during 1913 was 439. Of these 126 attended during the whole year, 173 were sent from the Institution and 179 were admitted. Four of the boys in the Institution died during the year.

The teachers in the school are doing efficient work, considering the fact that the pupils in all but the lowest class attended school only one-half of the year.

The attendance at the Alexandra Industrial School for Girls during 1913 was 151. Of these 47 attended during the whole year, 64 were sent out during the year, and 78 were admitted.

The girls are attentive, and, considering the circumstances, they do good work.

SUPERVISED PLAYGROUNDS

Supervised playgrounds were conducted in July and August in nine of the school grounds—in Queen Alexandra, Howard, Rose Avenue, Riverdale High School, Essex Street, Niagara Street, Jesse Ketchum, Strathcona, and York Street Schools. The playgrounds were open both forenoon and afternoon. A vacation school was conducted in Hester How School.

The amount spent for the supervision of the playgrounds and for the apparatus for use in them was $2,618.41.

The vacation school in Hester How cost $554.39.

The attendance at the supervised playgrounds was as follows :

Queen Alexandra School	168
Howard School	41
Rose Avenue School	84
Riverdale High School	105
York Street School	83
Jesse Ketchum School	117
Essex Street School	124
Niagara Street School	144
Strathcona School	74

The attendance at the play centres and the interest of the children were very satisfactory. The extension of the playground system in the school grounds is worthy of earnest consideration. Play is the chief joy of childhood. It is also the chief agency for the developing of the powers of the child. Free play calls into energetic action every element of a child's power. The supervision of play does not mean domination of the children nor intermeddling in the decision of the children in regard to their plays. The teacher in charge is the senior partner of the children to adjust differences, to plan the general management of the grounds so that all may have the opportunity to play without interfering with the rights and privileges of others. She also takes the place of a wise mother in comforting those accidentally hurt, in calling all to shelter in case of storm, and in protecting them from all kinds of evils by seeing that their language and conduct are at all times of a proper character. She also gathers them during the periods when they should rest, to tell them appropriate stories to kindle their imagination and store their minds with pure and high ideals.

The attendauce at the vacation school in Hester How School was 595.

This school added very much to the happiness and to the development of the children who attended it. There is

little of formal study or the acquisition of mere knowledge in the work of a good vacation school. The vacation school is intended to deepen true interests and develop the powers of the children, and at the same time to supply the children of densely populated districts in large cities with a safe place in which to play and do various kinds of work which are quite as interesting to them as play, such as music, art, the varied forms of manual training, stories—biographical, historical, folk tales, and the standard stories of mythology —and other similar forms of work and play.

In some important senses the school during vacation time is of even greater value to the children than during the regular sessions.

SCHOOL LIBRARIES.

The new plan which was adopted for the use of the library books in the schools in 1910 is working well. It was decided that the books in the Central Library should be divided into several groups, and that they should be circulated throughout all the schools in the city. In addition to the circulating libraries formed from the Central Library there are libraries in all the schools.

To the Chairman and Members, Board of Education, Toronto.

Gentlemen,—I have the honor to present the following report of the schools in my Inspectorate for the year, 1913.

Yours respectfully,

W. F. CHAPMAN

The Public Schools comprising Inspectoral Division No. 3 of Toronto, in December, 1913 were:—Brant Street, Brown, Hillcrest, Huron Street, King Edward, Lansdowne, Manning Avenue, McCaul, Niagara Street, Ogden, Palmerston Avenue, Ryerson, and the Shelter. This is one school fewer than in December, 1912, inasmuch as 1913 saw the closing

of Borden Street School to make room for the new Technical School.

Borden Street School was one of the older schools with a long and splendid record, and its last year showed no diminution in efficiency and achievement. The late Adam Morrision presided over it for years, with dignity, and was succeeded by Principal Armstrong, now Inspector, Mr. R. A. Ward and Mr. J. C. Rutherford. On the closing of the school Principal Rutherford was transferred to the Principalship of the new Pauline Avenue School; the Borden Street Staff, with a few exceptions, were assigned to King Edward and Lansdowne Schools, to which most of the Borden Street pupils were transferred.

The Shelter has no district like other schools, but is a school for the wards of the Children's Aid Society, and has, therefore, a very transient class of pupils.

Excluding the Shelter, the schools in this Inspectorate had a total registration in December 1912, of 9,461 pupils, and in December 1913, 10,258, showing an increase of 797 pupils. In addition to the 192 regular classes, there are 2 ungraded classes, 15 forenoon Kindergartens, 2 afternoon Kindergartens, and three centres for Domestic Science and Manual Training.

COMMERCIAL CLASSES

There are two Commercial Classes; one in Ryerson School, Senior and Junior combined, and one, a Junior, in Palmerston Avenue School. The best proof of the practical training for business, given in the Commercial Classes, is the testimony of so many business men as to the satisfactory way the graduates of these classes fill the positions to which they are appointed.

MANNING AVENUE SCHOOL

The new Manning Avenue School was opened in 1913 with a public entertainment and an Art Exhibit. This well-appointed school has 17 class-rooms in the main building,

Government Publications

including a large Kindergarten room ; there are wide halls, and commodious Principal's Office, and rooms for teachers and medical staff. On the premises, and housed in a special building are the Domestic Science and Manual Training Departments. This is the first time these departments have been given a separate building, and the advantages of this arrangement are so obvious that no doubt, where practicable, this plan will be generally adopted.

Manning Avenue School has the class-room walls adorned with fine pictures, making the pupils particularly fortunate in living daily under such refining influences.

STRATHCONA COMPETITIONS

Several Schools in this Inspectorate entered quite enthusiastically into the Strathcona Competitions. Every prize was keenly contested and the losers had nothing of which to be ashamed.

The following schools were successful in winning honors:

Brown School won First Prize for District in Junior Girls' Competition.

Hillcrest School won First Prize for District, and First Prize for City in Senior Girls' Competition.

Hillcrest School also won First Prize for District in Senior Boys' Competition.

Ogden School won First Prize for District and First Prize for City in Junior Boys' Competition.

Ogden School also won First Prize for District for shooting.

Lansdowne School won First Prize for District in Cadet Competition.

ATHLETICS

The Principals and Teachers of this Inspectorate hold a sane attitude towards athletics. They recognize their importance in developing a fine physique as well as many of

those qualities that make for best manhood and womanhood. The scholastic side of schoolwork is, however, put first, and other things made secondary and supplementary to it. The appointment of an Assistant Master to a school gives a great impetus to athletics.

Although the schools of this Inspectorate have the handicap of very small playgrounds in comparison with the newer schools, in out-lying districts, they took a fair share of the prizes and honors as shown by the following :

King Edward School won :

(*a*) Cup for Junior Boys in Intermediate Basket Ball League.

(*b*) Cup for Senior Boys in Intermediate Basket Ball League.

(*c*) Championship in Major League Football.

Lansdowne School won cup, Junior Basket Ball Championship at Y. M. C. A. League for city. This school has won cup, Y. M. C. A. Indoor Meet, 6 years out of 7.

McCaul School won Basket Ball Championship for Junior Girls, Junior Boys and Senior Boys.

Ogden School had the unique distinction of conducting a league in Indoor Baseball, both Spring and Autumn, among its own pupils, covering a series of about 30 games per team, and awarding medals or pendants to the champion team. In addition to their own league games, these teams played with teams from the neighboring schools, the High Schools, and the "Old Boys" and won the great majority of their games. This plan extends the benefits of athletics to a greater number, as well as creating greater interest and pride in "Our School". About 60 boys of the school took part in these games, and this league plan has been successfully conducted for three years.

RYERSON SCHOOL

In the winter season of 1912-13, Ryerson School won at the Y. M. C. A., the Shaw Junior Basket Ball Cup. The boys of this school were also successful in winning the Armstrong Cup for the championship at the general Athletic Meet; and also were contenders in the finals of the Intermediate and Senior Basket Ball Competitions. In the Spring of 1913 the Junior Commercial Out-door Basket Ball Cup given by the Public Schools' Athletic Association was won by Ryerson School. The Basket Ball Cups and the "Meet" Cup have been held by this school for two years.

CANADIAN NATIONAL EXHIBITION SCHOOL EXHIBIT

The Directors of the C. N. E. are developing year by year, a department showing the work of the schools and the progress in Education. Their efforts should be encouraged by all school people, inasmuch as such an exhibit is not only interesting but also valuable as indicating the progress of the nation in higher and better things than the material.

Some of the schools in No. 3 Inspectorate showed their interest in this matter by sending specimens of work in Art, Penmanship and Sewing, and the following schools received awards:

MCCAUL SCHOOL

(*a*) A First Class-Prize, and 7 Individual Prizes in Art, in Senior Fourth Grade.

(*b*) A First Class-Prize, and 2 Individual Prizes in Art, in Junior Fourth Grade.

(*c*) A Second Class-Prize in Penmanship, in Junior Fourth Grade.

(*d*) A First Prize Individual Writing, in Senior Third Grade.

(*e*) A First Class-Prize in Sewing, in Senior Second Grade.

RYERSON SCHOOL

At the C. N. E. of 1913 Ryerson School won five prizes in Writing open to the Dominion, namely, 1st, 2nd and 3rd prizes for Senior Commercial; 2nd for Junior Commercial, and 1st for Third Book Classes. This school also won the Boys' Dominion Writing Trophy Shield for the year 1913, at the Annual Exhibition held under the auspices of the Toronto Boys' Dominion, and incidentally had the honor of having the name of the school placed on the first Shield on the base.

TORONTO'S FOREIGN POPULATION

In the last few years Toronto has received a great number of immigrants from nations not Anglo-Saxon. So great has been this influx, that we have now in this city a foreign population of about 70,000.

If these people are to be assimilated and made good citizens, it must be largely through education. The Board of Education realizes this and provides liberally for these people. There are Night Classes for adults in which hundreds are struggling to get some proficiency in the English language. Six or more nationalities may be found in a single class.

The children of these foreigners, of course, have to attend our day schools. Perhaps the schools of Inspectorate No. 3 have a greater proportion of these than any other, inasmuch as these people are, in a measure, segregated in the centre and southern portion of the city. The large Ogden School (29 rooms) has about 65% of the pupils foreign; Ryerson School (26 rooms) 45.7% and McCaul (15 rooms) 90 to 95%. There are also a considerable number in Brant Street, Lansdowne, Manning Avenue and Niagara Street Schools. There is a special class in McCaul and another in Ryerson for these children corresponding to what are designated in Cleveland "Steamer" Classes.

The progress these pupils make is marvellous. The teachers do not know the language of these foreigners, and the results obtained prove that it is not necessary that they should to teach these people. The children are industrious, intelligent, respectful and obedient; they are exceedingly appreciative; they have that greatest incentive to effort, viz. feeling the need of what you are after, and their progress delights the teacher as it is so visible and rapid.

As an example of this rapid progress, I cite the case of Reuben Lieberman. Arriving in Toronto from Russia in June or July, 1910, Reuben Lieberman was advised by a compatriot, Sam Ross, to go to McCaul School as Sam, himself, had taken the Entrance Examination in one year, from this school. The opening of the schools in September, 1910 found Reuben Lieberman at McCaul School. He was placed in the Senior Fourth or Entrance Class knowing practically no English, but sufficiently advanced in Arithmetic for that grade. By the end of December he had obtained first place in the class. At an examination held in March following, Reuben ranked thus:—English History, 98% ; Spelling, 100% ; English Grammar, 89% ; Arithmetic, 100% ; and in April, he took 75% in English Literature. In June, he passed the Entrance Examination to High School with high standing.

In September, 1911, Reuben entered Jarvis Street Collegiate Institute, and was placed in form I. In January, 1912, he was placed in Form II. He did so well in this form, that in September following he was promoted to Form IV, passing over Form III. In June, 1913, after two years only in High School, he passed the Junior Matriculation Examination. The usual time taken for this course is four years. It may be hard to duplicate this case, but I do not believe it is an isolated one. Granting that Reuben Lieberman had mental power a little above the average, it still proves what may be accomplished by earnest application and intensity of purpose.

Since the session of 1907-08, Ryerson School has been used as a practice school for the students of the Faculty of Education in connection with the University of Toronto. The successful students are granted First-Class professional certificates good for the province of Ontario. We are yearly adding to our teaching staff, these graduates of the Faculty School, who have received their professional training in Ryerson School.

This Inspectorate, in common with the others, has some problems pressing hard for solution. Among the foremost of these is the care and training of the feeble-minded. There is but one class exclusively for these in the whole city, with the result that the pupils, who should be segregated into seven or eight more of such classes, are scattered through the regular classes of our schools. It is unfair both to these pupils and to the normal pupils that they should be together. Under such conditions, the sub-normal can receive neither the right kind of training nor the individual attention required. We are establishing ungraded classes for retarded pupils, and finding them to be of great service, but the efficiency of these classes must not be jeopardized by admitting to them the mentally defective. It is most desirable that the near future may see some determined effort made to solve this problem of providing the proper training for these unfortunate sub-normal children and likewise caring permanently for the same class of adults.

Another problem is ; What is the best school life for children up to seven and eight years of age? What proportion of time should be given to academic work and what to educative play ? How can these pupils be kept more in the open air to allow better physical development, and more positive happiness during these tender years? May we not project Kindergarten methods into primary work, and may not Kindergarten teachers incorporate primary methods in their work? Would this not prevent children remaining too long in the Kindergarten, and permit them to receive a

greater variety of progressive exercises so essential to the young child? This is a problem calling for immediate consideration.

Another matter calling for thought is: Cannot something be done for those pupils who leave school as soon as the law permits regardless of the fact that they have not completed the Public School course, many of them leaving from our Third Book Classes? Soon, these pupils learn from that great teacher, Experience, that their lack of an education is a tremendous handicap to that success in life that might be theirs. Should we not establish classes for these to which they could give part of their time? Would not employers co-operate by permitting and encouraging these young people to give part of their time to acquiring more education? The time thus devoted again to school should be divided between academic and vocational work. True there are Night Classes for such pupils, but after the fatiguing work of the day, it requires strong will power to prosecute work again in the evening, and, when willing, the individual is not in fit condition for efficient work.

Akin to this should we not have "Catch-up" classes during the mid-summer vacation for senior pupils who may have missed their promotion? As pupils are admitted to High Schools but once a year, if a candidate fails at his Entrance Examination, he must wait a year before he can begin High School work. This delay is so serious that frequently he abandons the higher course. His failure may have been in but one or two subjects. If such pupils were permitted to devote three or four weeks of the vacation to mastering their deficiency I believe many would avail themselves of the privilege, and the shock or humiliation of their defeat would prompt them to work as never before. Ambitious pupils should have such an opportunity. It is much the same principle as permits University Supplemental Examinations.

Again we have ever with us the problem of the relative value of the newer subjects such as Nature Study, Art, Music, Domestic Science and Manual Training, and the older subjects often designated as the three "R's". To what extent should the newer encroach on the time formerly given entirely to the older? The newer subjects are here to stay; their cultural value is unquestioned; they are attractive and develop qualities of head and heart that make for happiness and success in life. The old essential subjects, however, must never be displaced and become secondary to the newer. With capable, enthusiastic supervisors for these newer subjects the tendency is to give them undue prominence. To hold the proper balance of time between them demands constant attention.

The space at my disposal forbids the naming of other problems. The fact that we have problems to solve indicates progress, not stagnation. There will always be problems in education seeking solution, and as we value more truly the individual child, and realize that children are the greatest assets of the nation we shall, as teachers, officials, Boards of Education and Departments of Education, work more zealously for the best solution of all the problems that may confront us.

In conclusion I desire to bear testimony to the zeal and ability with which the teachers of Inspectorate No. 3 prosecuted their work during the year; also to the excellent work of the doctors and nurses in lessening contagion, in raising the standard of cleanliness, and in teaching care of the body, thus reducing pupils' loss of time through absence, and adding much to their progress and happiness.

Toronto, February 15th, 1914.

To the Chairman and Members
Board of Education
Toronto.

Gentlemen,—I beg to present herewith my first formal Annual Report on the Schools in District No. 4.

I have the honor to be,
Yours respectfully,
W. H. ELLIOTT,
Inspector of Public Schools,
District No. 4.

SCHOOL ACCOMMODATION

Totals	196	2	16	1	2	1	1	4

During the year 1913 there has been considerable crowding in the Alexander Muir, Dewson Street, Dovercourt, Essex Street, Kent, McMurrich, and Pyne Schools. These conditions have been partially relieved. The erection of a new 17 roomed Clinton Street School, and the enlargement of its boundaries westward, have materially relieved the

congestion in the Dewson Street School, though not sufficiently to enable the latter district to dispense with temporary accommodation in a portable building. The erection of the 17 room building on Pauline Avenue together with a change of boundaries of surrounding districts has reduced the congestion in Kent, Dovercourt and Essex Street, and relieved them of the necessity of using 7 rooms in basement or portable buildings. The erection of a new building on Regal Avenue, and the addition to McMurrich will permit the Board to dispense with some temporary accommodation in this part of the district. The crowding in the Alexander Muir School has offered the most serious difficulty. For some months a large number of children have been unable to gain admission to this school. Its location makes it difficult to permanently relieve its congestion by transfer of pupils. Such a transfer of pupils to Dewson Street, Kent and Givins Street has been made within the last few days, yet I fear, that this will not meet with the approval of many parents of the district.

If the addition to the Shirley Street School will be required for its own district and perhaps as a slight relief to Brock Avenue, then an enlargement of Alexander Muir School seems a necessity.

The limiting of the Regal Avenue Building as at present contemplated is in my judgment a mistake. If as seems likely, the Pyne School is soon to pass from the hands of the Board, and its pupils transferred to this new building, an enlargement must be made, which, while being carried out will most injuriously affect the work, not to speak of the health of both teachers and pupils.

The situation in the Essex Street district also calls for immediate consideration. At present the school is filled to its limit, while there are many houses within 200 yards of the school about ready for occupation. There will be sufficient school population in the near future to fill six or eight rooms.

I would respectfully suggest the erection of a primary school building on the west side of the large Essex site in which the much needed accommodation for Manual Training and Domestic Science may be provided. Such a scheme would relieve the Board of the necessity of purchasing an expensive lot as arranged for a year ago, and will place the school within easy reach of all the children.

RETARDATION OF PUPILS

A careful examination of the tabulated statements accompanying this report reveals the fact that a surprisingly large percentage of our city pupils are retarded in their progress throughout the grades, and leave our schools, either through discouragement or the necessity of assisting parents in providing for the upkeep of the home.

Of 1938 children registered in the Junior First Grade of the schools of this district, only 783 or 40% are in the Senior Fourth and Commercial Grades. 1155 or 60% have evidently fallen from the ranks before what is considered a minimum education has been secured.

A glance at Table 2 above, reveals the fact that the registered attendance in the grades upward shows a steadily declining ratio to the total registered attendance of the school. The Junior First Grade has 18.5% of total attendance, while the Senior Fourth has but 5.9%. The only grade having an attendance greater than its predecessor is the Junior Third which shows an attendance of 11.7% as compared with 10.9% in the Senior Second Grade. This is accounted for by the fact that the Junior Third Grade has but one

promoted annually, while the Senior Second Grade has two.

Tables 4 and 5 above, have a very significant bearing on the topic of retardation. Of the 10458 pupils in the various grades, 2957, or over 28% are above the average ages for the various grades, while 3199, or over 30% have been more than one term in a grade. (A "term" here means, for Jr. 1, Jr. 3, Sr. 3, Jr. 4, Sr. 4, 1 year; for Sr. 1, Jr. 2, Sr. 2, 6 months).

Of the 3199 repeaters, 852 have spent from 3 to 8 terms in a grade.

This is a most serious condition and measures should be taken at once, towards its amelioration.

The relatively small percentage of repeaters and of those above the average age for grades in Kent and Dewson Street Schools is, without doubt, partially accounted for by the social conditions and home life of the districts in which these schools are located; but the inconstancy of the percentage of repeaters in other schools where the home conditions are apparently alike shows that other factors are operating, notably, the general organization and management of these schools.

It is worthy of note that, with one slight exception, the largest schools of the district, in which there are the best opportunities for effective organization, show the smallest percentage of retardation.

After a careful observation of school activities in this district, I am led to conclude that among the more immediate and potent causes of this retardation are, the overcrowded condition of our primary classes; the in-elasticity of our school programme of study; the system of promotion; and the carelessness of parents.

OVERCROWDED PRIMARY CLASSES

While the average number of pupils per teacher in the Kindergarten where the work takes the form of play, is but 30, our primary classes have shown an average per teacher

of 52. This number is altogether too large in view of the fact that here the important subjects of Reading, Writing and formal number work are begun. When one considers the standard of proficiency in the elementary subjects demanded of these mere infants before they are promoted to the next grade, and the fact that much individual work is necessary on the part of the teacher, he will understand the hopelessness of securing regularly the promotion of nearly a whole class each term. About 50% remain in the class another term, in many cases to mark time for some months. Here is where the retardation begins, and discouragement, which, later, to some brings delinquency, and to all, insufficient education.

A material reduction in the maximum number of pupils allotted to a primary teacher will alleviate this condition.

THE SCHOOL PROGRAMME

A good school programme should contain such subjects of instruction and should provide for such activities as appeal to the varied interests of the children of different ages and different inclinations. Children are not all born alike. They are not equal either mentally or physically. Some show a strong tendency towards mathematics, while they are correspondingly weak in spelling or art. Others to whom mathematics is an impossibility, show a marked ability in literary and artistic work. To require for all pupils the irreducible minimum standard of efficiency in all the branches taught in a grade, is to my mind, as cruel as it is unpedagogical.

The time spent listlessly in the colour work of the grades by some pupils who have no inclination whatever for it, and never will have, would be much better spent in attending to some other subject, or activity, having a more direct bearing upon their lives. This is no condemnation of Art as a subject of the programme, but rather of the practice of instilling within a boy a dislike of school work generally, by forcing

him to undertake a form of work for which he is unfitted.

SYSTEM OF PROMOTIONS

Our system in Toronto provides for two promotions annually in Forms I and II, and for one promotion annually for Forms III, IV and V. This on the whole, is probably the best for our urban graded schools; yet, except in very isolated cases, no provision is made for the promotion of a pupil from one grade to another when he is fit to undertake the work. Some pupils develop much faster than others of the same class, and should not be required to mark time for weeks, or in some cases, months, till the regular promotion time arrives. Such halting is sure to breed discontent in bright pupils, and in not a few cases, to supply favorable conditions for the formation of habits that finally make for their undoing.

Again the regular promotion examinations demand a uniform standard of efficiency in all subjects. As a result many pupils are detained term after term in a grade. They may have been efficient in all subjects except Arithmetic or Spelling. In one or other of these, they have failed to measure up to the standard required for promotion. It is safe to state that many of them never will. But this is no reason why they should be forced to mark time in subjects for which they have a marked ability.

PRIMARY WORK

A careful observation of the work in our primary grade has forced me to the conclusion that our programme here is at once too extensive and too narrow—too extensive, in that it makes too heavy demands upon very young children in number work; too narrow in that it gives too little scope for the exercise of the constructive and play instincts.

The accuracy and rapidity with which these children of six and seven perform the addition of long columns of figures is nothing short of marvellous. But I fear that this daily

grind towards perfection carried on for months, may, in many cases, produce a mental atrophy. Without doubt, this time could be spent to much better advantage in other activities.

The subject of Arithmetic is far too much stressed in all our Junior Grades. I have no hesitation in stating that our pupils would be just as far advanced in Arithmetic at the age of 10 or 11 if its formal study were postponed to the second form. By at least dropping the Arithmetic requirement in Junior First Grade, except in so far as it includes the incidental study of number, we shall have much more time to spend in Reading and Literature, Oral Reproduction, Stories, Constructive Work in Plasticene and Paper, and Organized Play.

Such would be an infinite gain to the children in that it will permit of at least, half of their school time being spent in the open air, and will admit of the Kindergarten spirit being carried on in their lives.

At present, there is a dearth of Supplementary Reading in our Primary Grades. Most of what is there has been supplied at the teacher's expense. A well selected library should be supplied by the Board of Education for every class room. Books for the Primary Grades can be purchased, in quantities, at a very small cost, and a beginning should be made this year.

BACKWARD CLASSES

The treatment of backward children is a subject that forces itself upon the attention of all who have to do with large schools. Scarcely a room can be found in which there are not from one to three pupils who cannot keep the average pace of the pupils of the class. They require an amount of individual attention which it is impossible for the teacher of the graded class to give them. In all our large schools a special class should be formed for such pupils. This class should be relatively small, and its pupils should remain only so long as is necessary for them to develop sufficient power

to proceed with the work of the grades from which they were taken.

The establishing of these backward classes will relieve the teachers of a heavy burden and permit of much more rapid progress being made by both the normal and backward pupils.

To the Chairman and Members,
Board of Education,
Toronto.

Gentlemen,—I have the honour to present herewith, my report for the year 1913.

Yours respectfully,

E. W. BRUCE,
Inspector of Schools.

SCHOOLS.

There are seventeen schools with a total of two hundred and forty three class rooms in my inspectorate.

The accommodations of all, with two or three exceptions are very satisfactory. The buildings are modern and the school grounds large, with three exceptions. The grounds of Bolton Avenue, Kew Beach and Morse Street Schools are small for the number of pupils.

The equipment of each of these seventeen schools is well up to the standard. If would be an improvement to have the number of maps, charts and globes increased in some, and a larger supply of various kinds of readers in most of the schools. There is also a lack of blackboard sets in the schools.

It is a pleasure to report that the work of the caretakers in all the schools is excellent.

The parents should be grateful, indeed, for the modern improvements in the schools, and the healthful condition in which they are kept. The general condition of the schools and surroundings reflect much credit on the interest, which is evinced by the members of the Board of Education, and especially by the local members of my inspectoral division.

TEACHERS

There are in the seventeen schools alluded to, two hundred and eighty teachers, of whom fourteen are Kindergarten directors, twenty five assistant Kindergartners, two Domestic Science teachers, and two Manual Training teachers.

I am fully satisfied with the work that is being done by the principals and assistant teachers in the schools of my inspectorate. They are giving faithful and efficient service in their respective schools. It would be difficult to get together a more capable staff of educators. On all of my several visits a most cordial assistance has always been extended to me.

SPECIAL INSTRUCTORS

In common with the other inspectoral divisions of the city there are:

A Supervisor of Drill and Calisthenics.
A Supervisor of Kindergartens.
A Supervisor of Domestic Science.
A Supervisor of Manual Training.
A Supervisor of Music, and one assistant.
A Supervisor of Art, and one assistant.
A Supervisor of Writing, and one assistant.
A Supervisor of Physical Training, and one assistant.

I recognize the usefulness of the work of these twelve supervisors. They are specially qualified for their work and are enthusiastic in the performance of their duties. I should, however, like to see less teaching by the supervisors in classes whose teachers know the work, and the time of the super-

visors given mainly to new teachers on the staff who need both instruction in the subjects and assistance in teaching them.

To the Chairman and Members of the Board of Education.

Gentlemen,—I have the honour of presenting my Annual Report of the schools of my inspectorate for the year 1913.

Yours respectfully,

JOSEPH WHYTE ROGERS
Inspector of Schools.

The schools of my inspectoral division are all situated West of Dufferin Street and include the Victoria Industrial School at Mimico and the school in the Queen Mary Hospital at Weston. The names of the schools, the number of classes and the registered attendance for the months of January and December as well as the increase of attendance during the year are given in the sub-joined table as follows:

SCHOOL	No. of Rooms		Reg. Attendance		Increase in Attendance
	Jan.	Dec.	Jan.	Dec.	
Annette Street	20	23	945	1031	86
Brock Avenue	12	12	603	599	—4
Carlton	12	14	581	687	106
Earlscourt	18	18	723	882	159
Fern Avenue	20	22	992	1017	25
Howard	16	18	867	876	9
Hughes	5	9	220	482	260
Parkdale	13	14	560	565	5
Perth Avenue	23	29	1183	1248	65
Queen Mary Hospital	.....	.....	.....	33	33
Queen Victoria	17	18	830	853	23
Shirley Street	8	8	412	414	2
St. Clair Avenue	6	6	241	240	—1
Strathcona	11	13	544	634	90
Victoria Industrial	4	4	288	288	.....
Western Avenue	13	14	622	664	42
	198	223	9611	10,513	902

It will be seen that the increase in attendance has been very marked. Of the 198 classes open in January, 21 were

in temporary quarters, 18 of them in portable buildings, halls and basements. Of the 223 classes open in December, 20 were in temporary rooms, 16 of them being in portables, halls or basements.

During the year the Board of Education has completed an addition of 3 new rooms at Strathcona, 3 rooms at Western Avenue, 9 rooms at Perth Avenue, and have in process of construction 7 rooms at Howard, 6 rooms at Shirley, 4 rooms at Strathcona, 4 rooms at Western Avenue, as well as two entirely new buildings at Carlton and on Keele Street, so that though at the close of the year there are 16 classes in portables, halls and basements, before many months sufficient accommodation will be completed to provide for present needs, but not too much for the rapidly growing north-western part of the city.

During the last two years my attention has been drawn particularly to the large number of children in certain localities who seemed to be older than the children of the same grades in other districts. This led to enquiry along the line of the differences in ages in the same classes and the various causes therefor.

The standard ages for the various grades of our schools may be taken from two separate and distinct conditions which give practically the same result. They are found from the average age of those who take the Entrance Examination, or the examination for Entrance to High Schools, which is found to be very close to 14 years. Taking this age as a standard for graduation from the Public Schools, and the time required by an average child to complete the work of the several grades, it will be found that the age to begin in

Sr. 4 Book Class is 13 years.
Jr. 4 Book Class is 12 years.
Sr. 3 Book Class is 11 years.
Jr. 3 Book Class is 10 years.
Sr. 2 Book Class is 9½ years.
Jr. 2 Book Class is 9 years.
Sr. 1 Book Class is 8½ years.
Jr. 1 Book Class is 8 years.

In reference to the ages of Jr. 1 and Sr. 1 Book Class children, I am taking into account those who enter school much later than the average city child.

Take also the compulsory ages for attending school which are 8 to 14 years. These ages will also give you the same standard ages for the several grades.

Now, taking the number of children in the classes who are from 1 to 3 years behind the standard ages, the percentage varies from 20 to over 50% of backward pupils, as shown in the table below:

SCHOOL	Registered No.	No. pupils 1 or more yrs. backw'd	% of backward pupils	No. of Mental defectives	% of Mental defectives	Entrance Examination			
						No. who Wrote	No who Passed	Average Age	
								Years	Months
Annette	969	382	39.42	16	1.65	50	43	14	9
Brock	578	211	36.50	2	.34	32	29	14	5
Carlton	614	193	31.43	3	.48	9	6	13	11
Earlscourt	821	391	47.62	5	.60	18	14	14	4
Fern	1012	407	40.21	5	.49	40	39	14	7
Howard	827	328	39.54	1	.12	50	41	14	4
Hughes	421	184	43.70	4	.95	3	2	13	6
Parkdale	512	262	51.16	...	.....	19	18	14	9
Perth	1110	459	41.35	16	1.44	27	20	14	3
Queen Victoria	814	373	45.82	6	.73	67	47	14	4
Shirley	353	211	59.77	1	.28	...	...	...	...
Strathcona	618	146	23.62	11	.....	18	13	13	11
St. Clair	211	70	33.17	4	1.89	3	1	14	2
Western	613	274	44.69	10	1.63	26	16	14	6

These are backward from several causes. They are not all, nor are they to any very considerable number, mentally defective children. Some are backward through long and serious illness. Some through maladies due to scarlet fever or other disease, and some are foreign. But even these totalled do not explain the large number of "repeaters": The cause must be sought elsewhere.

Consider the fact that the large majority enter school at 5 or 6 years of age and remain about a year in the Kinder-

garten. Consider also that from the time they enter Kindergarten at 5 years till they enter Senior First Book Class at 8½ years, they have been 3½ years in school. Is the progress commensurate with the time consumed? Have children been given a love for school work? Are the difficulties of the Second and Third Classes to be charged to the First Book and Kindergarten grades? Are we expecting too much from the younger children? Is it in the interests of Education to keep children *at desk work in the class room* as long between 5 and 8 years as in the higher grades? It would seem questionable to continue practices which show so little for the time involved.

Is the Kindergarten living up to its promises of years ago? Do children trained therein show superiority in progress, learning or adaptability? These are questions which the educational experts must answer.

One thing seems to be evident that a great waste exists between the entering of children at the age of 5 years in Kindergarten and the entering of the Senior First Book at 8½ years.

It is also a fact that children who enter school late, say at 7 or 8 years of age, are more likely to graduate from the Public Schools at twelve years than those who enter school at the very tender age of 5 years. It therefore becomes apparent that close confinement for young children, and indeed, for children of any age, is a detriment. It is a question if the Kindergarten should be allowed indoors during any but inclement weather.

THE PART TIME SYSTEM

Great evils or urgent demands have been the bases of great reforms in all ages. The evil of lack of accommodation has forced the driving of some classes into the open for a part of the day; and *to distribute the conditions*, good or bad, two classes *in some localities have used the school* room

of one class for a part of the day each, and for the rest of the day worked out of doors.

The details of the plan need not be explained here, but suffice it to say that so satisfactory was the trial given this proposition that teachers and children alike have become enthusiastic in its praise. The regular work was divided so that number work, art, nature work and such subjects as could be done out of doors were taken in the open as well as an extended period for games; other subjects as convenient were taken indoors. The advantages arising from better air, more play and exercise in the open and increased healthful vigor at once began to show in brightness of countenance. contentment, zeal for indoor work, all of which were increasingly satisfactory to the interested parents and teachers.

May we hope that a deep and extended interest will be taken in this new departure from the old rut of grinding out scholars by a milling process of so many heads per year.

THE VICTORIA INDUSTRIAL SCHOOL

This important institution was founded several years ago by philanthropic citizens for the purpose of providing an outlet for the pent up physical powers of such boys as were not situated so as to get that training for which their peculiar powers and their particular needs called. The wisdom of those philanthropists in providing a part time education for boys where their mental development was made a partner of their physical growth, and a harmony established between the physical, mental, moral and religious sides of their human nature, was greater than the wisdom of those who lay so much stress on the utilitarian side of an education merely. True education must regard these four sides of human nature and no institution comes so near to the ideal in its aims and purposes as was in the minds of the fathers of this institution.

It was intended, not for criminals, but for neglected and

Government Publications

badly trained boys. It provided for sanitary conditions, and for proper food and clothing, for instruction, mental, moral and social, as well as for the physical needs of the boy. It provided for intelligent and useful labour as well as for recreation and play. And it enabled the boys to develop along lines of higher social and national practices as well as in manly confidence in their own powers and a sterling faith in their fellowmen.

It was not intended as a reformatory nor as a place for the incarceration of criminals, nor for the detention of the idiotic or weak minded, but, as I said before, as a training school for the neglected and badly trained boy. Since the amalgamation of the Victoria Industrial School and the Reformatory at Penetanguishene all four classes have been sent to the Victoria Industrial, so that this enterprise which started out with such splendid ideals has become a combination of a school, a hospital for idiots, and a penetentiary, no one of which purposes is served as it might, and otherwise, would be. The remedy must be provided by popular demand for complete separation of the mentally defective and so-called criminal classes from what was originally intended to be, and thus would become a splendid industrial and educational institution. The present conditions are exceedingly unfair to a competent management and a faithful staff. It is to be hoped therefore, that a remedy may soon be provided which will afford sufficient relief to re-establish this school on the basis intended by its founders.

THE QUEEN MARY HOSPITAL

During the year a school was opened in the Queen Mary Hospital at Weston for such children as are for a time sent to the Sanitarium to be relieved of the dreadful white plague. A room well lighted and heated by steam has been provided as a school room at the top of the building.

The equipment and teacher are provided by the Board of Education for the City of Toronto and it is hoped the

children, varying in number from forty to fifty, will by this means be able to retain their relative standing with their more fortunate brothers and sisters who have no need to attend this or any similar institution.

SUPERVISION

In conclusion let me say that at no distant day the necessity for the consideration of the relative values of the several subjects on the course of study for the Public Schools will be of prime importance. That certain subjects of the Public School curriculum should be considered so important as to require the exclusive attention of two or more special teachers, who have direct access to the teachers of the grades to impress their opinions on them, places a corresponding embargo on the freedom of the teacher of the grade to give due consideration to such subjects as are not so specially drawn to their attention.

Is Art of more importance than number or the power to compute? Do more people make drawings to express thought than are forced to make mental calculations of the cost of ordinary things? Is the knowledge of music of greater importance than the correct use of English? Is it less tolerable that some people should make no attempt to sing than to have one's sense of propriety shocked by a hideous violation of the laws of speech spoken or written? Is the subject of Physical Culture not so thoroughly mastered by the average teacher of today that any one who has taken the Course could direct the work in her school as well as she can direct the work in English Language or History or Geography? To be logical, History, Geography, Arithmetic, Language and Literature should also have special teachers to direct their teaching and inspire their teachers to greater diligence.

SCHOOL DESKS

In the matter of school desks we still seem to be in the dark ages. There was a time when the reading desk was

the prevailing idea for a school desk. Then most of the work of the schools was oral. It is now many years since oral work was dominant in the schools, yet still we follow the old custom of the slanting desk, modified, it is true, yet in such a form that no business man of standing from Halifax to Vancouver would tolerate it in his office for twenty-four hours. Then why do we inflict on the child who is learning to use the pen the conditions which render it well nigh impossible for him to succeed?

Lastly, the Board of Education is to be congratulated on the construction of their modern school buildings. The necessity for a modern equipment is, I am glad to observe, being recognized in the addition of teachers' rooms, lunch rooms, medical rooms, lavatories which are perhaps being put in in the most modern form. yet from the educational standpoint are not above criticism. I am glad to say that a very decided advance is being made in school discipline, teaching and teaching conditions all along the line.

To the Chairman and Members of the Board of Education.

Gentlemen,—I have the honor to present the following report for District Number Two, for the year 1913.

Respectfully submitted,
G. H. ARMSTRONG,
Inspector of Schools

Tables 1, 2, 3, and 4 of this report will furnish interesting and illuminating information pertaining to the race, complexion, age of entering school, progress and withdrawal of pupils.

The Part-Time System introduced into the Primary Classes of the Toronto Schools during 1913, through the instrumentality of Trustee Dr. John Noble, is in operation in four schools in District No. 2, viz. Rose Avenue, Dufferin, Sackville Street and Winchester Street Schools. Briefly, play alternates with work (formal studies) every half-hour.

In fine weather, the half-hour of recreation is taken in the open air, (school grounds, ravines or parks), in stormy or inclement weather, it is taken in the play-house or work-shop. The system continues to grow in favour with both teachers and parents, and is apparently the salvation of the children from every point of view.

Our compulsory attendance service is not adequately effective. We have three officers for Toronto, at present. There should be five, one officer for each Inspectoral District. Each should have an office in a central school building of his district, with telephone service. All suspected cases of truancy in a school should be 'phoned to him from the principal's office by 9.15 a.m., each day, and should receive the officer's immediate attention. Prompt treatment would reduce truancy 100%. As matters are now, a truant may be out three or four days before the officer is on his track. With arrest and punishment so far away, the lad is tempted to take to his heels. The present system rather puts a premium on truancy.

So crowded is the modern curriculum that it has become something of a burden to teachers and children alike. Is there dead wood awaiting the hand of the pruner? Does every subject of the class-room of today tend to evolve and enrich the life of the child? Apparently no subject can very well be spared, but we must learn to eliminate, to give the major part of our time and energies to the essential subjects, and more especially to the essential principles of all subjects, dwelling only on those lines of each subject which bear upon the immediate human interests of the child. Herein lies a pressing educational reform.

Many teachers who have been recently appointed to our staff have had very little opportunity in the training schools, to observe an expert teacher at work, in the grade to which he or she has been assigned on our staff. For instance, a teacher informed me recently, that she had seen but one lesson taught in her grade in her year of training, and that

lesson was taught by one of her fellow-students. It is recommended that each inexperienced teacher have the privilege of observing for one half day in the term, an expert teacher of her grade, in one of our schools and that an occasional teacher be supplied for her class during her absence. The selection of the teacher and class to be observed, time, arrangements re this privilege, report from visiting teacher, etc., may safely be left in the hands of the Board's officers. Such an opportunity would kindle many a commonplace probationer, and bring increased returns to our children, of from one to a hundred fold. Such is the testimony, too, of our principals, where private arrangements have been made to grant this privilege to a teacher, whose work was unsatisfactory.

The retardation of pupils in the grades is a very present problem. Irregular attendance, overcrowding of the classroom, under-feeding, improper feeding, and the passive attention of city children to formal studies, owing to the many passing, dissipating interests of artificial life, are evident causes of a condition more and more calling for redress. But there is a common cause often overlooked, the tendancy of most teachers to concentrate attention upon the bright children of the class, adapting the lessons to contribute to the progress of those who readily reflect credit, and ignoring largely the slow and unkindled children. This procedure should be reversed, the teacher should concentrate on the fringe of the class, those who are behind, and who see not the way, ignoring to a large extent the clever and the normal, who will find the way almost alone. Herein lies a better solution of this problem than is to be found in ungraded classes. To this end the teacher of a junior grade especially should use wisely the half-hour period from 3.30 to 4 p.m., for individual work with backward children; more, the hour from 11 to 12 a.m. should be given to the children who are behind, the bright ones being sent off home or to the playgrounds.

Not the least of Lord Strathcona's interest in Canada is represented by his contribution to stimulate the Physical Training of the school children of our Dominion. Teachers and pupils alike have been kindled into enthusiasm for the inheritance of a sound, serviceable body. Sackville Street, Winchester Street, Dufferin, Deer Park, and Cottingham Street Schools won well-deserved rank in the annual compet-

itions. It is recommended that the prizes be distributed hereafter for the best class work throughout the year, that is, that the training become extensive, rather than intensive as it is now. The object should not be to make a few professionals, but a generation of normal, healthy, well set-up girls and boys.

I cannot close this brief survey without testimony to the industry, ability and professional zeal of the teachers and principals. I think I may say, too, that all are diligent seekers after educational truth, frequently essaying into new fields of child areas, and embodying daily in class methods that which proves more effective than the petrified forms of the past. There is not a hireling to be found. Each is ambitious not only to excel in teaching the formal studies, but to train well future citizens in skill, power and character.

REPORT OF THE SUPERVISOR OF MILITARY DRILL AND PHYSICAL EXERCISE

To the Chairman and Members of the Board of Education, Toronto.

Gentlemen,—I have the honour to submit the following report concerning the work in the Department of Military Drill for the year 1913.

I have the honour to be, Gentlemen,
Your obedient servant,
JOHN T. THOMPSON, Lt.-Col.. R.O.
Supervisor, Military Drill.

The work in the several grades is uniformly successful and continues to improve, as the number of teachers who have qualified as Cadet Instructors, has increased.

The Annual Parade held May 23rd, with the Empire Day demonstration, was most successful.

Colonel the Honourable Sam Hughes, Minister of Militia and Defence for Canada, accompanied by his Staff, reviewed and inspected the Cadets and was pleased to issue the following memorandum :—

"It affords the Minister the greatest pleasure to express his high appreciation of the splendid and soldierly spirit displayed by all the Cadets in the review. There is a marked improvement over previous years. The officers were better instructed in saluting, the Companies kept better line, better step, displayed a more soldierly bearing, and marched like natural men, with a free, manly, fearless look on their faces. The Collegiate Cadets showed to splendid advantage in their Khaki."

The Annual inspection of the Cadets was held on June 6th, 11th, and 16th. by Major Barker, O.I.C., Military District No. 2. The report of the inspecting officers was highly satisfactory.

The Cadet Camp held at Niagara was attended by one thousand Cadets of Toronto Public Schools, and was a great improvement on the Camp of last year.

Major General Lessard was pleased to issue the following memorandum:—

"The General Officer commanding desires to express his appreciation of the excellent manner in which the Cadet Brigades carried out their duties at the Camp, and congratulates the Brigadiers and Battalion Commanders and the Officers on the results attained, more especially on the occasion of the tactical exercise carried out yesterday, and at the review this morning.

It is sufficient to say that on both these occasions the Cadet Brigade worked as well as Regular Troops, and the Camp Commandant hopes that all ranks will take away with them pleasant recollections of their stay in Camp.

In conclusion the Camp Commandant bids goodbye to all, and looks forward to seeing a larger number of Cadets at the next Camp."

Sir Ian Hamilton, Inspector General of His Majesty's forces in the Colonies, inspected and reviewed the Cadets on June 10th, and expressed his great pleasure and high appreciation of the splendid appearance and soldierly bearing of the Cadets.

RIFLE SHOOTING

The usual rifle practice was continued in the Armouries during the months of January, February, March and April, and at the Rifle Ranges during the months of May and June.

In the competitions for the year, Wellesley School Cadet Company won the Earl Grey Shield for shooting at the Rifle Ranges, Winchester Street School won the Chamberlain-Williams Cup, and Huron Street won the Marshal Cup.

The Strathcona Trust Competitions in Military Drill and

Riflle Shooting were held in the Armouries, November 7th, with the following results:—

MILITARY DRILL
City Championships

1st, Kent School. 2nd, Howard School.
3rd, Bolton Avenue School.

District No. 1

1st, Bolton Avenue. 2nd, Leslie Street.

District No. 2

1st, Winchester Street. 2nd, Sackville Street.

District No. 3

1st, Lansdowne. 2nd, Huron Street.

District No. 4

1st, Kent. 2nd, Essex Street.

District No. 5

1st, Howard. 2nd, Perth Avenue.

RIFLE SHOOTING
City Championships

1st, Winchester Street. 2nd, Huron Street.
3rd, Givins Street.
District No. 1, Bolton Avenue.
District No. 2, Winchester Street.
District No. 3, Ogden.
District No. 4, Givins Street.
District No. 5, Fern Avenue.

The hearty co-operation and goodwill of the Inspectors, Principals and Teachers has been deeply appreciated.

REPORT OF THE SUPERVISOR OF PHYSICAL TRAINING

To the Chairman and Members of the Board of Education:

Gentlemen,—I have the honor to submit the following report regarding the work in Physical Training in the Toronto Public Schools for the year 1913.

Respectfully submitted,
BERTHA F. SRIGLEY

"The Syllabus of Physical Exercises for Schools," published by the Executive Council of the Strathcona Trust, and approved by the Provincial Department of Education, is in use in all the Toronto Public Schools. This book, besides a brief outline of the uses and effects of Physical Training, contains seventy-two Tables of Exercises arranged for class-room work and graded according to the ages of the pupils. Each table contains eight groups of exercises, which taken consecutively, exercise all the important muscles of the body. The seventh group in each table, however, which has a most beneficial effect upon the circulation, respiration and muscular control, has to be omitted in the classsrooms, owing to the effects which the marching, running and fancy steps have upon the second and third floors of the school buildings.

It is recommended that a half hour every week, in addition to the present short allowance of five minutes a day, be allowed each class, during which time these exercises may be taken in the drill hall or kindergarten room.

The tables of Exercises for the grades are arranged as follows;—

Junior First	Tables 1 to 5
Senior First	" 6 to 11
Junior Second	" 12 to 17
Senior Second	" 18 to 24
Junior Third	" 25 to 36
Senior Third	" 37 to 48
Junior Fourth	" 49 to 59
Senior Fourth and Commercial	" 60 to 72

The work is taken every morning in the class-room, with windows open, usually after the first hour period, the exercises being such that boys and girls may be taught together, as in other subjects. The work is done in all the classes. In Commercial Forms, where high desks interfere with the performance of some of the movements, classes are taken to kindergarten rooms or drill halls for certain set periods.

The results sought for in the work are as follows:—

1. The Educational result—to remove dullness and inaptitude, displacing it by alertness, precision and motor expertness, and to inculcate habits of prompt obedience and self-control.

2. The Hygienic result—to promote good health for the present and secure it for the future.

3. The Corrective result—to obtain good postures, and to offset the bad effects of malpositions.

4. The Recreative result—to provide relaxation and pleasure in the midst of tension and concentration of thought.

Teachers' classes in Physical Training conducted by qualified instructors, were attended by about eight hundred teachers. During the spring term Sergeants Keith, Joyce and Carpenter held classes at Ogden, King Edward, Grace Street, Winchester Street, Howard and Kent Schools. In the fall term the course was given at Kent and King Edward Schools by Miss Cora M. Cole; at Clinton Street and Dewson Street by Miss Harriette Rogers; at Howard and Leslie Street by Miss Gertrude Dobson; two classes at Winchester Street by Miss Lillian Hilborn; at Brown and Queen Alexandra by Miss M. Macorquodale, and at Howard and Huron Street by Mr. G. N. Bramfitt. This course helped the teachers greatly in their school work, which as a result shows marked improvement.

Fifty-two teams entered the Strathcona Trust Compe-

tition. The preliminary contests were held November 7th and 8th, the winning teams in each district entering the final contest held November 14th, at Ogden School.

The following teams were winners of the district prizes, the first named in each case winning the city prize and the others being named in order of standing:—

(*a*) Girls (over eleven)

District 3—Hillcrest (City Prize)
District 5—Annette Street
District 2—Dufferin
District 4—McMurrich
District 1—Balmy Beach

(*b*) Girls (under eleven)

District 1—Balmy Beach (City Prize)
District 4—Dovercourt
District 5—Annette Street
District 2—Deer Park
District 3—Brown

(*c*) Boys (over eleven)

District 2—Sackville Street (City Prize)
District 1—Kew Beach
District 3—Hillcrest
District 4—Kent

(*d*) Boys (under eleven)

District 3 Ogden (City Prize)
District 2—Sackville Street
District 1—Bolton Avenue
District 5—Howard
District 4—Kent

The judges in the final competition were Miss Lena Miller, Major R. K. Barker and Mr. Bramfitt. The competition was keen and the teachers who trained the classes are to be congratulated upon the excellence of their work.

The work in Physical Training throughout the schools, has on the whole, been satisfactory, and the results most encouraging. It has been the experience of all the teachers who have taken these exercises regularly as part of the every day class work, that this work is not only of great benefit as regards the improvement in the general bearing and health of the pupils, and the forming of correct habits of standing, sitting, walking and breathing, but is also a very decided aid to discipline and order.

The interest and enthusiasm of the children in this work have been an inspiration, and the hearty co-operation and good will of the inspectors, principals and teachers have been deeply appreciated.

REPORT OF THE SUPERVISOR OF MUSIC

To the Chairman and Members of the Board of Education :

Gentlemen,—I have the honour to submit the following report regarding the work in Music for the year 1913.

Respectfully submitted,
LLEWELLYN REES.

In February 1913, the Sub-committee on Supervision, after an investigation, recommended the appointment of two assistants to the Supervisor of Music. The Board of Education approved of the recommendation and Mrs. Carrie Spence of Essex Street School, and Miss Emily Tedd of Frankland School, were appointed and given charge, under my supervision, of the Junior Classes in the Western and Eastern Districts, respectively, with Spadina Avenue as practically the dividing line.

I am very glad to report that the two assistants are doing good work and that they are both successful in securing the co-operation of the teachers.

Exercises to secure breath control, to develop the proper

mode of breathing, to give the pupils power to sing with a free, full, pure and sweet tone and to sing by note are practised in all classes.

When pupils as a class, sing at sight an exercise, although it may appear, because of their agreement, that they are being governed by the association of notation and sound, it is extremely likely that a number of the pupils are not conceiving a single sound, but are simply following a line of least resistance and unconsciously imitating what they hear. The only way to circumvent this dependence of the pupil on imitation is to make the individual the whole objective of the teaching. Pupils are, therefore, encouraged to try alone the exercises, and they rapidly gain confidence, with the result that there is a decided improvement in individual sight-singing in a large number of classes.

Part-Songs are introduced in the Senior Second grade, and continued in the Third and Fourth Book Classes. Three-part singing has become general in the Senior Third and Fourth Book Classes, and the number of classes is steadily increasing where the pupils are getting their inspiration from the music itself, thus developing the power to sing with proper expression and interpretation, in order that they may be able to convey to the minds of the listeners the message of the piece.

Songs dealing with out-door subjects are sung with keen enjoyment by the pupils in the various grades, and there is a noticeable improvement in tone-quality, coupled with a free graphic expression naturally developed from the words and sentiment of the songs.

The fuller appreciation of the importance of rhythm marks an advance movement in the regular teaching methods in many schools.

Systematic instruction in ear training is given in all the grades. The Senior Classes write from hearing phrases in the minor as well as in the major scale.

Teachers' Classes were organized for the purpose of giving instruction in music and in methods of teaching the subjects to teachers, who cannot obtain satisfactory results in teaching the music of their grades as laid out in the Course of study. Two hundred and two teachers were registered in these classes.

The annual Concert on Empire Day was exceptionally well patronized by the general public, and the singing of the children received great praise from the music critics of the press. Five thousand were tested and one thousand selected for the concert chorus. There were on the programme selections from the great masters, Verdi, Wagner and Handel.

Several schools entered competitors in the Solo, Double Trio and Choir Competitions. Dr. Vogt, Mr. A.T. Cringan, Mus. Bac., and Mr. Frank Welsman acted as adjudicators.

The best two in each competition appeared in the final contest at the concert.

The final contestants were :—

SOLO COMPETITION

Frank Taylor, Queen Alexandra School.
George Branton, Essex Street School.

DOUBLE TRIO COMPETITION

Dovercourt School Double Trio, trained by Mr. R. W. Nicholson.

Essex Street School Double Trio, trained by Mrs. Carrie Spence and Mr. W. H. Harwood.

CHOIR COMPETITION

Essex Street School Choir, trained by Mrs. Carrie Spence and Mr. W. H. Harwood.

Borden Street School Choir, trained by Miss Hattie Williams.

In the Solo Competition the first mentioned won the

gold medal and the second the silver medal.

In the Double Trio Competition all the final contestants received medals and the first mentioned the Hiltz Trio Shield.

In the Choir Competition the first mentioned won the Simpson Shield and the second a Silk Banner.

Although the competitions were keen, the best of feeling prevailed throughout both among the trainers and contestants.

Several of our teachers attended the first term of the Two Summer Term Course, established by the Department of Education, for the training of Teachers to become Supervisors. The Department is offering special inducements, by way of special grants to School Boards to engage Supervisors. As a large number of our teachers receive their early education in rural and village schools, this summer course for Supervisors is of great importance to the Board of Education in Toronto, as it will eventually lead to systematic instruction in Music in these rural and village schools, thus giving the future teachers of our schools opportunities of getting a better grasp of this important subject.

Visitors from Western Canada, England and the United States visited the schools with me during the past year, to hear the children sing.

The cheerful co-operation of the principals, teachers and pupils is much appreciated.

I wish to express my gratitude for the support, encouragement and courteous treatment I have always received from the Chief Inspector.

REPORT OF THE SUPERVISOR OF ART

To the Chairman and Members of the Board of Education :

Gentlemen,—I have the honor to submit the following report of the work in Art for the year 1913.

Respectfully submitted,
JESSIE P, SEMPLE,
Supervisor of Art.

The course is planned in accordance with the requirements of the Government Regulations, and is so arranged that these requirements follow one another logically in such sequence that they are adapted to the varying interests of the pupils from season to season, to their stages of advancement from grade to grade, and to available material at different times of the year. The work for the various grades, is included in the "Course of Study" at present in the schools.

The general aim of Art Instruction is to cultivate creative power in our pupils along right lines, and to develop skill to express in suitable mediums.

The basis for the development of creative power is in observation and experience, therefore the training in observation of both form and colour by painting or drawing from well selected examples in nature and in manufactured objects is of great educational value. This training in observation also includes training in judgment and good taste, as the selection and arrangement of the things to be drawn, and the proper placing of the drawing or painting on the paper according to the laws of composition, tone balance and colour harmony, are just as much a part of a lesson as is the drawing or painting itself.

Design is, especially for our senior pupils, a most important branch of the work as shown by the place this subject is accorded in modern technical education. It gives opportunity for the exercise of creative power to its fullest extent.

The designs made are not abstract, but are always intended for some particular use, and applied whenever possible. This department of the work includes the study of balance and harmony in line and mass, and a progressive sequence in the study of colour harmonies from grade to grade. In the very simple designs of our primary classes, the first step—that of combining any one color with black, white or grey—is taken; from this starting point they are lead by easy gradations until in senior classes they work in various harmonies, discovering such harmonies in nature, in textiles, etc., and make color schemes from these for their own use. This work is based on definite instruction in the laws that govern good design, and the knowledge so gained has opportunities for daily application in the home, in the selection and arrangement of the various ornaments and furnishings, and in the taste displayed in dress. There are many occupations in which a knowledge of design is of inestimable value.

With regard to the progress made in the work during the year, it is to be noted that in junior classes special attention has been given to the thought side of illustrative drawing and the results show decided improvement. This form of self-expression is a joy to the children, who are often able to express their thoughts in this way much better than they could by means of written or even spoken language. The drawings are undoubtly crude, but they give to the thoughtful teacher glimpses into the childish minds that should point the way to many a lesson in other subjects as well as in Art.

In senior classes the work in pencil outline has been emphasized and improvement is very general, many classes doing excellent work. The progress in design has been very satisfactory.

This year the Board of Education appointed, as my assistant, Miss Margaret D. Moffat who entered on her duties in May. The work assigned to her is the supervision of the work done in First and Second Forms. She is doing excel-

lent work and has the hearty co-operation of teachers and pupils. This assistance in the junior classes has enabled me to devote nearly all my time to the Third and Fourth Forms, and yet have general supervision over the whole work. All classes are now being visited about once in two months.

Voluntary classes for teachers of Forms III and IV were held on Saturday mornings in Ogden School and were largely attended. Form III work was in charge of Miss Moffat, while I devoted my attention to that of Form IV. It is to be regretted, that during this year, it was not possible to hold classes for junior teachers, many of whom asked that such classes be formed. During the coming year extra Saturday time will be planned to meet this need. Credit is due to those teachers who so willingly give of their free time to this work.

The annual exhibit of pupils' work in Art displayed at the National Exhibition was an interesting feature to parents and children, and especially so to teachers. The work was selected and arranged to show, as far as possible in the limited space at our disposal, the development of the work from grade to grade. Someone was present each day to answer questions or to explain the sequence of the work to interested visitors.

In addition to this exhibit, which was in no sense competitive, there was also displayed the work of classes and individual pupils who were competing for the prizes so generously given by the National Exhibition. Prizes were won by the following schools,—McCaul, Brock Avenue; Bolton Avenue, Kent, Queen Victoria, Rose Avenue, Western Avenue and York Street.

At the close of the Exhibition the Art work of the Toronto Public Schools was placed in Ogden School as a permanent exhibit and may be seen at any time by those interested.

In conclusion I wish to express my appreciation of the work done by the teachers. The Supervisor can do much by commending success and encouraging effort, correcting mistakes and showing good methods of teaching, but it is the teacher who does the work with the pupils from day to day. Visits to classes where work is well done, are a joy and inspiration in the daily round of an always interesting work.

REPORT OF THE SUPERVISOR OF MANUAL TRAINING

To the Chairman and Members of
The Board of Education,
Toronto

Gentlemen,—I have the honor to submit the following report of the Department of Manual Training for the year 1913.

Respectfully submitted,
JAMES N. MOFFATT.

Manual Training in Toronto Public Schools has now passed the experimental stage and is an integral part of the work of every grade. It is a carefully graded course of constructive work so planned as to give deftness in hand-manipulation, at the same time providing training in thought expression and giving opportunity for the development of the judgment and the executive ability.

In the first, second and third book classes, the work is conducted in the regular class-room under the supervision of the regular teacher, the materials used being various colored paper, cardboard, clay, plasticene etc., and wherever possible the work is correlated with other subjects:—Nature Study, Geography, History, etc.,—and in many instances the projects completed are of a practical nature, and are made use of in the class-room. Here might be mentioned, blotters,

books, portfolios, covers for books, cases for bank books and report cards, crayon boxes, pen and pencil trays, etc. In this work the pupils give evidence of an ever-increasing delight, and too much credit cannot be given the teachers for their pains-taking efforts in making the work interesting and instructive. The Supervisor is pleased to report that the grade teachers are exhibiting remarkable skill both in carrying out the work planned for them, and in their efforts to seek new and original ideas.

The attempt is made to involve a rational sequence of difficulty in each kind of work undertaken, and to encourage neat and careful work from the start. Although the production of good pieces of work is made prominent, especially the work suggested by special days, ex.—Christmas, Easter, St. Valentine's day—the great benefit derived from school handwork is the mental training received.

The boys in the Fourth Book Classes receive their manual instruction in specially equipped centres. There are thirteen of these centres, each in charge of a special instructor. Mechanical drawing is taught, and while wood is the principal material used in constructive work, other materials, reed, copper, brass, etc., are also used, to give decoration and further utility to many of the articles constructed.

One new centre has been opened and equipped at Perth Avenue School, under the capable direction of Mr. A. J. Davidson. Another desirable addition to the staff of instructors is Mr. J. O. Close, who has been placed in charge of the centre at Annette Street School.

As an evidence of the success which has attended the advanced shop-work in Oakwood Collegiate Institute under Mr. R. N. Shortill provision has already been made for the opening of another centre at Riverdale Collegiate Institute, and it is to be hoped that in the near future each of the city High Schools and Collegiate Institutes will be similarly provided for.

Another feature of the work, which is gradually increasing in extent and in usefulness, is the Night Classes in Manual Training. These classes are now conducted in Kimberley, Queen Alexandra, Dewson Street, George Street and Manning Avenue Centres. The latter was opened in 1913 under the direction of Mr. T. T. Carpenter, and along with the others has been productive of most gratifying results.

In conclusion the following recommendations are humbly made :—

1. That in view of the fact, that large numbers of boys never reach the Fourth Book Classes, and, of those who do, many remain at school for only a short period, provision be made for extending the shopwork so as to include boys of the Third Book Classes.

2. That special provision be made for instruction in handcraft for boys in such special schools as Sackville, Brant, Hester How, and McCaul, and for institutional schools such as Joseph Workman and Allan.

3. That the special needs of the Manual Training Room be taken into account where possible in the original plans of new school buildings. The room should be on the ground floor, when a part of the building. A more ideal condition is a separate building on the school grounds which could also accommodate Domestic Science Classes.

4. That an average of twelve students be sufficient to warrant the continuance of Night Classes in Manual Training.

5. That boys attending High Schools that have no Manual Training be eligible students for Night Classes in Manual Training.

A very pleasing feature of my work should be noted in the very hearty co-operation of the Chief Inspector and District Inspectors, and the courteous treatment received at the hands of the principals and teachers of the various schools.

REPORT OF THE SUPERVISOR OF HOUSEHOLD SCIENCE

To the Chairman and Members of the Board of Education :

Gentlemen,—I have the honor to submit the following report of the work in Household Science and Educational Sewing, in the Toronto Public Schools for the year 1913.

Respectfully submitted,

IDA M. HUNTER,
Supervisor of Household Science.

The following is our Course of Study in Household Science :

1. A discussion of the home and its function.

2. An examination and study of the equipment of the classroom.

3. A detailed study of the methods of cooking, the effects of heat upon common food materials, and simple food combinations, with the object of acquiring a knowledge for the reasons involved and facility in manipulation. This includes a study of boiling, simmering, steeping, steaming, broiling, pan-broiling, sautéing, frying and baking ; the simple cookery of fruit, vegetables, cereals, milk, eggs, meat and fish, and the making of flour mixtures, soups and puddings.

4. Preparation of simple meals. This includes a study of marketing, routine of work, table setting and serving, and table manners.

5. Simple lessons in general housework ; dishwashing, cleaning methods, dusting, sweeping, and bed-making.

6. Care of the sick. This includes the preparation of a simple diet for the sick, bandaging, and the making of plasters and poultices.

The following is our Course of Study in Educational Sewing :—

In the Senior Second Grade :

1. Stitches taught; even and uneven basting, running stitch, back and half-back stitch, overcasting and cross stitch.

2. Models made; mats, needle books, purses, pin-cushions, pen-wipers, handkerchief cases, dolls' bonnets and d'oylies.

In the Junior Third Grade :

1. The stitches previously taught are applied and the new stitches taught are hemming and top-sewing.

2. Models made; handkerchiefs, bags, pillow cases and aprons.

3. Mending taught; hemmed patch and top-sewn patch.

In the Senior Third Grade:

1. All stitches previously taught are applied and new stitches taught are hem-stitching and feather-stitching.

2. Models made; d'oylies, (*a*) with fringed edge, (*b*) with hem-stitched hem, (*c*) with damask hem; white flannel skirt.

3. Mending taught; stocking darning and dress darning.

The aims of the work have been as follows :

1. To assist the pupil in acquiring a knowledge of the fundamental principles of correct living.

2. To co-ordinate the regular school studies so as to make a practical use of knowledge already acquired.

3. To inculcate by means of practical work habits of neatness, promptness and cleanliness.

4. To give a definite knowledge of the principles in-

volved, that a pupil may have confidence in her ability to do work—that she may learn to accept responsibility.

5. To develop reasoning powers.

6. To develop creative powers.

7. To give a broader and nobler conception of all household work.

8. To make good citizens.

9. As the majority of our pupils will eventually have a home to take care of, our greatest aim is to assist them to be, in the fullest sense of the word, home makers.

During the past year, a few of the Fourth Grade Classes were unable to receive instruction in Household Science, owing to lack of accommodation for them. We should have a centre in each school of eighteen rooms or over. This would allow us to extend the work to all the Senior Third Classes, and would do away with the necessity for the pupils travelling long distances for their lessons.

Arrangements are being made with the Central Neighborhood House, for the use of their rooms, so that we may open a Housewifery Centre there, for the girls of the Third and Fourth Book Classes of McCaul, Victoria Street and Hester How Schools.

The following is a general outline of the work to be done there:—

Each class is to be divided into three sections:

1. Under the supervision of a Nurse.

2. Under the supervision of a Sewing Teacher.

3. Under the supervision of Household Science Teacher.

The Nurse's work is to be arranged by the Medical Inspection Department.

The Sewing Teacher is to teach the simple stitches now taught in the schools, and apply them in:

1. Mending the children's garments.

2. Mending the linen at the centre.

3. Making over clothing belonging to the pupils.

4. Making new clothes, the children to supply their own material.

5. Making over or re-trimming hats.

6. Making and trimming new hats.

7. Relative value of materials for different articles of clothing adapted to the varying seasons; how to distinguish a good article from an inferior one.

The Household Science Teacher is to teach:

1. The relative value of foods ; wise buying ; making cheaper portions palatable and nutritious; developing a taste for Canadian foods.

2. The cooking of simple dishes that the children might use in their own homes.

3. Table etiquette.

4. Cleaning of woodwork and windows in the kitchen, dining room and bedroom, and simple renovating of rooms.

5. Sweeping and dusting of these rooms.

6. Care of the bedroom including the making of beds, cleaning, etc.

7. Care of the dining room including table setting and serving of meals.

8. Laundry work, including the sorting, washing and ironing of their own garments, removing stains, etc., making starch, etc.

I had the privilege of visiting Housewifery Centres in several cities in England and in New York, and I know them to be productive of much good. If the work at this new

centre meets with your approval, I shall ask to have this work extended to other sections of our city.

The Ontario Department of Education allows each Household Science Centre a grant not exceeding $100 for books for a library. We spent a portion of this grant last year so that each centre now possesses a number of books on Household Science. These have been very much appreciated both by pupils and teachers.

The annual exhibit of school Sewing was displayed at the Industrial Exhibition and a number of schools entered the competition for prizes. Prizes were won by the following schools:—George Street, McCaul, Earlscourt, Alexander Muir and Lansdowne.

At present Sewing is taught in the Senior Second, Junior Third and Senior Third Grades. It should be continued in the Fourth grades. This has not been done for the following reasons:—

1. Sewing is taught in the schools by the grade teacher, and the majority of the Fourth Grade Classes are taught by gentlemen.

2. The girls of the Fourth Grades should be taught the making of undergarments, and it is not practicable to have this done in the regular classroom. A sewing room would be required in each school for this purpose.

3. The teaching of advanced sewing should be done by specially trained teachers. This work is too difficult for the grade teacher unless she has had a course of instruction.

I would suggest therefore that each school should have on its staff, a grade teacher qualified to teach sewing. This teacher should teach all the sewing taught in the school.

In making this suggestion I do not under-estimate the work that has been done by the grade teachers. I cannot speak too highly of the work done by them. They have

always been ready and willing to do even more than I have asked. Allow me to give you a couple of examples; One Junior Third Class dressed 60 dolls for the Cnristmas tree of a Kindergarten in a poor district; another class made nearly 100 garments and distributed them among the poor.

I am greatly indebted to the teachers at the Household Science Centres and the Grade teachers for their hearty co-operation.

REPORT OF THE SUPERVISOR OF COMMERCIAL WORK AND PENMANSHIP

To the Chairman and Members of the Board of Education:

Gentlemen,—I have the honor to submit the following report of the Penmanship and Commercial Work in Toronto Public Schools.

Respectfully submitted,

W. W. NOBLE,

Supervisor of Commercial Work and Writing.

Much praise is due to my predecessor, Mr. S. H. Armstrong for his untiring efforts to improve the writing of the pupils of the Toronto Public Schools. From my knowledge of the system in use in the City Schools, and as the result of my observations on several visits to each of these, I wish to state that splendid work, from Primary to Fourth Classes, is being done in those schools in which continuity of method, along the lines suggested by him, is being observed.

The appointment of an Assistant to the Supervisor has resulted in a division of the work of supervision, the I and II Book Grades generally being visited by the Assistant, the III, IV and V Grades by the Supervisor. To equalize the work, and also that he might keep in touch with the work in the Junior Grades, the Supervisor has taken all the grades in a number of the schools. The Assistant has been

assigned those schools in which a lady Principal is in charge.

In connection with our work a card system has this year been introduced. On each card provision has been made for recording the results of twelve visits to each room. In connection with each visit the following points are noted:— Blackboard work of the teacher, including working models of the small and capital letters; writing in, and neatness of, pupils' Work Books, Exercise Books, etc.; pen-holding and correct movement; the course as a whole. The work of these departments is classed as bad, poor, fair, good or excellent.

It is much to be regretted that the space the Canadian National Exhibition allotted to the educational output of 50,000 children is so inadequate. It might be good policy on the part of the Directors of the C. N. E., the next time they make an appeal to the citizens for a grant, to include an Educational Building in their building program.

The display of writing this year was up to the usual high standard.

In the Class Competitions in Writing, the following schools (all Toronto) won:—

Senior Commercial—1. Dufferin.

Junior Commercial—1. Bolton. 2. Givins.

Senior Fourth—1. Dufferin. 2. Lansdowne.

Junior Fourth—1. Givins. 2. McCaul.

Senior Third—1. Dufferin. 2. Queen Victoria.

Junior Third—1. Queen Victoria. 2. Kimberley.

In the Individual Competitions the Prize Winners (all Toronto children) were from the following schools :—Ryerson (5); Dufferin (5); Deer Park (3); Alexander Muir (1); Annette (1); Manning (1); Winchester (1); Earlscourt (1).

A just criticism of the Writing in our schools should take cognizance of the following points :—

1. Professedly, muscular movement writing is being taught.

2. Large writing is being used in the Junior classes as being more conducive to movement.

3. The purpose of the system is to reduce the writing in size as movement is obtained.

4. Many pupils, and obviously not the best, leave school before they have acquired a business hand.

5. Many thousands of children from European Countries and from outside towns and provinces have come to Toronto in the past few years. Without exception, almost, they have no knowledge of muscular movement in writing. The teacher undertakes to impart this knowledge.

6. Many hundreds of additional teachers have been employed in those same years, and so the continuity of the work has been broken.

In this connection I would say, that, after several hundred visits, in the last year to the Toronto Schools, I have yet to find the writing of one incoming pupil up to the average of Toronto Schools.

I would also say that I am positively amazed at the high standard of efficiency obtained in many of the schools, both in form and movement. The neatness of the routine work in Work Book, Exercise Book, etc., right through the grades of many schools, is worthy of note. Very great credit is due to the teachers for this high state of efficiency.

The work of the Commercial Classes is excellent; that of the Fourth classes and much of that of the Junior classes, is generally excellent.

R. H. COWLEY,
Chief Inspector.

Medical Inspector's Report

BOARD OF EDUCATION, TORONTO

Department of Medical Inspection

To the Chairman and Members of the Board of Education :

Gentlemen,—I have the honor to submit herewith my third annual report of the Department of Medical Inspection, reports from the Dental Inspector and Superintendent of Nurses and detailed reports of the work of each Medical Inspector and School Nurse.

There are so many things in the life of a school child that have an important and intimate relation to its health and development that our field of labor is a wide one. These factors have an important bearing also upon its mental and moral development as well as its physical, its school progress, its general efficiency, and its ability to assume its civic and national duties and responsibilities. The health of the school child is the most vital question before any State, for on that depends national existence and success. In this connection governments so far have not paid sufficient attention to the changing social conditions of rural and urban life and the increased cost of living. To-day every able bodied person, in a household must be revenue producing so the young child goes without parental care and training and is allowed to shift pretty much for itself, except for the oversight and discipline it receives in the public school, and this still leaves much to be desired. Under the changing social conditions of present day life, the public school will have to assume a larger and larger share of the duties and responsibilities that should properly fall upon the shoulders of the parents. Life work is becoming so sharply specialized that this seems to me inevitable. Many mothers are experts or capable in lines of work that are revenue producing, but have no knowledge or but an indifferent knowledge of those household duties that are vital to the health and development of their children.

For her to learn by experimenting upon a husband and children is usually not only disastrous to the household harmony but also to the health of all concerned.

We all agree that much of a child's health, its mental and physical powers, depends upon its care in infancy and its ancestry—the health and physique of its forbears. I cannot enter here into the important question of heredity. Moreover we have to deal in the main with children who have first come under the supervision of the State in the school, and the question is how can the State best discharge its duty to those who are so soon to be its citizens. Eugenics and euthenics will find their most important and practical application in the field of intelligent supervision of the health and development of the school child.

Personal and general hygiene should have a far more prominent place on the school curriculum. Clean and right life habits will mean more for a child in life than a smattering of art and music. The relation of health to education must be emphasized, and this must include consideration of the home conditions of school children, not only the teaching of personal, home, and civic hygiene, but also a consideration of food and food values, buying, preparation, cooking, cooking utensils, and other housecraft, and their relation to local economic conditions. Malnutrition is rife among school children due to bad cooking, unwholesome food, and unhygienic conditions.

There should be more intimate relations between the parent, the school teacher, the school nurse, the school dentist, and the school physician in the social life of the community as well as a more active co-operation in the school work. If the great aim of education is that of fitting individuals for their duties to the community and to the State, the school life of the child, should touch the social life of the community more than it does, so that the habits, traditions, and superstitions of parents ignorant of the laws of

health will not still continue to mould the life habits of the child. So the closer the harmony between the parents, the school teacher, the school nurse, the school dentist, and the school physician the better for the children, and the more likely to secure continuity, a desirable uniformity, and the best efficiency. This health supervision and training of the school child must be entirely in the hands of the above named school officials. No outside body, philanthropic or otherwise, should be allowed to take part in it. The School Board should be entirely responsible through it officials. The function of the school physician, dentist, and nurse is to guard the physical well being of the pupils and thus increase the efficiency of the school teacher and help the development of the child.

If the school is to discharge its social duties to the community, it must be the social centre of the neighborhood. It must be ready to supply wholesome food in a sufficient variety, to supply pure milk, especially during the hot weather; to teach the evil effects of tea and coffee on the nervous systems of growing children; to teach mending of clothes and of footwear; to secure sufficient rest, quiet, and sleep for its children; to give healthy amusement, mostly in the nature of social play, and avoid the stimulating, exciting kind of the street so destructive of health; to supply shower and plunge baths; it is impossible for children to love cleanliness where there are no decent facilities in the home to obtain it; to supply free glasses, if necessary, where there is defective vision; to give proper heating, lighting, and seating in the classrooms, and an abundant supply of fresh, humid air. Ventilation is a very important factor in the health and school progress of the child. The two conditions that are almost wholly responsible for the frequency of ill-health among school children are impure air and decayed teeth. Daily poisoned by vitiated air and the busy pus factories in the mouth how is it possible for our children to have good health! Children are peculiarly susceptible to

impure air, producing that restlessness, irritability, inability to concentrate the attention so well known to us all, or the later stage of the poisoning exhibited by sluggishness and somnolence. Yet men calling themselves architects and sane men are making every effort to produce school buildings, that give us daylight, Thank God! but that are hermetically sealed to the outside air. Advocates of closed windows tell us that one-fifth to one-sixth of the coal used in heating a building is used in raising the temperature of cold air that centres a room through the air leakage of windows. So they propose to adopt special devices on windows that will stop 90% of the otherwise unavoidable air leakage or ventilation around windows. This is a retrograde movement. Instead we should make all our schools approach the open air type. The failure of mechanical ventilation systems to give an adequate supply of pure, fresh, humid air, air in the natural state, should banish such systems from our schools. We are all familiar with the wonderful effects on the health of children of an open air school life! Apart from the difficulty of removing the impure exhaled air by our present processes how much does heating impair the vitality of air? How much does the high temperature demanded by the body in a dry atmosphere produce superficial breathing and impair the expansion of air cells? How much does lack of air movement in the classroom prevent change of the aerial envelope of the body and impair body respiration? All these conditions combined have a more or less disastrous effect on child health and development. All our schools should be built so as to approximate the open air type. Let us get away from conditions that are undermining the health of the nation.

To-day it is noteworthy that the physical side of education—health education—for the first time in our history is receiving its due share of attention. For the first time in history careful scientific attention is being given to the formation on which the entire edifice of national education must be reared.

THE FOREST SCHOOL

In the Forest School health is given the first consideration. Here we gather the poor little waifs whose home and school conditions robbed them of their patrimony of health.

These children are taught how to live. "It must not be forgotten that the education of the young child is primarily physical, and not primarily intellectual. To some extent modern life makes home training and supervision incomplete or faulty. The school therefore, in some measure, must take the place of the home, and the teachers undertake some of the duties of parents. But this should be a partnership between the State and the family and bring the school into closer relation with the home. It is poor economy on the part of the State to allow children who are underfed, physically defective, or diseased to attend school. The child receives little or no benefit from a costly education; it is not being fitted for useful citizenship; instead of the child becoming an asset to the nation it becomes a total loss, for after a lingering painful effort to overcome its handicap it either enters criminal life or dies in its youth. To cure obvious disease, to remove obvious physical defect is but the obvious evidence of ordinary humanity; our vision and our wisdom should enable us to see further into the future; let us train children how to live in a healthful way and teach them the laws of health—personal and general hygiene are specially vital importance in modern life.

At the Forest School children usually spend ten hours out of the twenty-four in the open. What effect has this open air life—simply breathing the open air—upon health, physical and mental development? It is easy to see general effects and to make general statements, but almost impossible to obtain comparative statistics, for we must not forget the other things at the Forest School that have their effect on the general health. Here we must consider the relative importance of the purity, humidity, temperature, and move-

ment of the air—the respiration of the lungs, and the respiration of the body.

Cold quickens and deepens the respiration and produces a corresponding increased rate of metobolism. This calls for increased physical exercise, and physical drill, calisthenic and other exercises are frequently given at the open air school. In fact the school periods are only about one half the time at the regular day school. The rest of the time is given to sleep, play, gymnastic exercises, nature study, and drill. We must consider too the therapeutic effect of direct sunlight. It is said that the refracted rays of the sun are equivalent in their effect to mild x-rays.

The Science of Nutrition has a close and practical relation to the Science of Eugenics, and both to Education, for it boots little to have a child well born if it is not well fed, trained, and disciplined. Meals are always partaken in the open, even in places where the school is continued through the winter. How much does this help digestion by keeping the body surface cool and increasing the blood supply to the digestive organs? Children are given three meals a day at the school. They are asked to take a cup of milk only before leaving home, and on arrival at the school are given a breakfast of cereal, sugar, milk, bread and butter. Dinner at noon consists of soup, potatoes and meat, occasionally eggs, vegetables, bread and butter, milk, and pudding. At 3 o'clock, after the rest period, they were given a cup of milk, and at 5.30 supper consisted of milk, bread and butter, light cake, or fruit; apples, bananas, prunes, and occasionally strawberries. There is little variation in the diet, except what is afforded by the different kinds of vegetables. The question of food values is somewhat modified by the question of cost. In children there is a natural tendancy to an excess of carbohydrate food, which is of course the cheaper food, but an effort is made to keep the diet fairly balanced. Butter comes high and so does milk, but fortunately we were able to get a good quality of milk at a very special price. Beef, mutton and occasionally fish

furnishes the albuminate portion. We also had some difficulty at first over this plain diet. These children have been accustomed to all kinds of truck instead of wholesome food, so after stimulating their appetites we have to educate their tastes. In considering the effect of this diet on the child we must also consider the effect of proper cooking; the effect of regular hours for work, rest, play, sleep, and meals; the effect of improved digestion and assimilation and increased tissue metabolism stimulated by the outdoor life and physical exercise; and the effect of regular attention to the excretions. The catering and cooking and personal hygiene of the children is under the supervision of the school nurse.

At first all these children look upon the two hours sleep after dinner as a great hardship. Few of them know anything about home discipline, except the kind that is shown by outbursts of anger and flogging. Their health has been broken not only by unwholesome food and poor cooking but also by the excitement and late hours of the street.

Last year our school was open for six months, and, during that time the children were in their classes in the open without hat or extra wrap. In the ordinary school room where the temperature is never allowed to drop below 70 degrees, where every movement of air is carefully prevented, the child's system is not called upon to produce body heat for itself; heat is oversupplied artificially, and hence tissue metabolism is sluggish, assimilation and excretion are impaired, and the child's physical and mental activities clogged.

In our Forest School every child must have a tooth brush. We supply one if necessary. The tooth brushes are kept separate in the following way; small staples large enough to hold a tooth brush were driven into a large smooth board at regular intervals and in several rows. Each staple was numbered and the number given to a child. This holder was placed on a wall within easy reach of every child. After each meal the children took their mugs, lined up ac-

cording to number, and under the supervision of one of the larger pupils acting as monitor, came forward in order for their tooth brushes. They formed into several ranks, arms length apart, and boys pass along the ranks with pitchers of water, filling each child's mug. Then the nurse puts them through a thorough and systematic tooth brush drill. I think we claim priority for the tooth brush drill in Toronto, and in the nose blowing drills. The children are supervised at the wash-up before meals. Each child brings its own towel. The tub bath is given once a week at least. We insist also on the necessary attention to teeth, mouth, and throat, eyes, and ears; all decayed teeth are filled, adenoids removed, and nose-breathing taught.

The gain in weight is but one evidence of an all round improvement in digestion, assimilation, and excretion ; of wholesome food and good cooking ; of a regulated life of work, rest, sleep, play, and meals ; of personal cleanliness, oral hygiene, and all that goes to make up the out door life. We have changed the child with the dull, lustreless eyes, pale, pinched face, skinny arms, round shoulders, contracted chest, distended abdomen, and puny body into one that is alert, erect, active, bright-eyed, and vigorous. The natural comradeship between teacher and pupils in the Forest School helped a great deal to mould habits and morals and to develope character in children whose life had been mostly of a very sordid kind.

One of the developments of open air school work is the open air class room.

Comparisons here give:

52% better attendance.

11.2% better results in promotions.

Varying results as to gain in weight.

The school was opened on May 13th, and closed on Nov. 15th, making a total of six months and two days the school

was open, and a possible total attendance of 160 days ; that is omitting Sunday only. Two children were in attendance 158 days, three 150 or over, and quite a large number were very near the 150 mark. It is to be regretted, however, that there were a number who were quite irregular in their attendance due to parental indifference or carelessness. The Principal of the school, Mr. Dent, and the School Nurse were assiduous in their efforts to keep the children regular in their attendance. Many times children were late for the car in the morning because they had been allowed to play on the streets at home too late at night. The children were too tired to be up and ready for the car at 7.15 or 7.30 a.m. 31 children had an average attendance of 10 days. The reasons given for non-attendance in these cases are: sent to the country 8 ; religious scruples 1 ; parental indifference and lack of home control 12. Of the others who did not attend the full time 2 left the city, 4 were kept home to work and one family was deported. The school nurse and one of the teachers camped in the park since school opened ; also the Principal, who had from 10 to 12 of the boys of the school camping with him for some time in July and August. 65 children had their teeth filled and cleaned, 7 had tonsils and adenoids removed, while a number had other minor operations. Six children showed loss of weight—from ¼ to 1¾ pounds. All of these had attended but a short time, two of them were operated on for adenoids and tonsils, and two of them lived under home conditions of the very worst kind, where home care meant more or less abuse. It takes a large vision, a large charity, infinite patience, unbounded zeal, and a high hope to sustain those engaged in a work that presents so many and diverse difficulties, where there is so much parental carelessness or indifference, where parents through ignorance or viciousness oppose the best interests of the child, and encourage habits that blast the hope of physical vigor and moral rectitude. On the other hand it has been a great satisfaction to see the results obtained in most of the children cared for. These results cannot be

shown in any dramatic way, and perhaps only those engaged in the work, who have been privileged to watch the awakening mind, to see the increased physical vigor, the brightening eye, the new life, the new hope, can appreciate in the living flesh the great possibilities in child welfare work. The average gain in the weight of 84 children who were pretty regular in their attendance was almost 6 pounds. The gain varied from 2½ to 15 pounds. Permit me to again point out that the gain in weight although very desirable and one of the objects in view is but a small part of what has been accomplished. Besides the renewed health and strength, the child's ideals have been raised, and a vision given of the high calls in life.

The school life and school work was carried out along the same lines as last year. We had, however, more physical culture drill and supervised games. The Principal deserves great praise for his enthusiastic care and attention to the best interests of the children. Good work was also accomplished by Miss Cameron and Mrs. Thompson, the teachers, of the junior classes. School progress was satisfactory, but our highest aim was an all-round development that would give these children a new ambition, a desire to make good in life, a desire to be useful, efficient, independent; we have aimed to produce some order out of chaos, a disciplined mind as well as a healthy body, moral habits as well as cleanliness, a courteous manner as well as a vigorous independence. By the recent action of the Board in adopting a policy of extension of Forest School work for next year, a wider field is opened up, with, I believe, certain results of greater good.

But I have said that I consider decayed teeth the next greatest factor to impure air in the ill-health of school children. It is, therefore, a source of the greatest satisfaction to know we have been enabled to start the school dental clinics. The first one opened at Roden School on April 16th, and the second at Annette St. School on April 17th. Since then one has been opened at Queen Alexandra and Earlscourt Schools.

This is a fair and satisfactory beginning to overtake the great task in front of us. I believe it is not too much to say that the adoption of this wise and progressive policy in the care of the children's teeth will mean a practical revolution of health conditions among our school children. A conservative estimate of the number of children in the public schools of Toronto having decayed teeth is 45,000. In some of these, of course, the conditions are not very bad. There are, however, at the very least estimate from 20,000 to 25,000 school children with septic mouths and carious teeth ; where children have coated tongues, inflamed gums, foul breath, and abscesses pouring out poison into their systems, causing indigestion and intestional disturbances, breaking down vitality, and inviting disease. All too many of these children have mouths in a horribly septic condition—diseased buds of weaklings and criminals in the making. It is not possible for these children to thrive well, even if they do receive wholesome food. But, as a matter of fact, they are largely fed on slop foods and sweets because of pain and tenderness, or the absence of a decent masticating surface, and this but aggravates conditions. It is only of recent years, perhaps, that the medical and dental professions have recognized to the full the tremendous importance of the condition of the teeth on the health. It is now recognized beyond dispute that these unhealthy conditions of the mouth are the cause of anaemia, rheumatism, joint diseases, pneumonia, intestinal infections, besides leaving the child more susceptible to measles, scarlet fever, diphtheria, and tuberculosis. This is not a mere guess, but has been proven by laboratory investigation. Apart from the distress and waste incident to disease and death, the expenditure for school dental clinics is sane and sound economy. The average stay of children of school age in the hospitals last year was about thirty days. At the usual rate of $1.00 per day, the City would pay $12,000.00 for 400 children, which is only five per cent. of the 20,000 children exposed to disease because of foul and unhealthy mouths. Each school dentist can care for 400

children per year, and an increasingly larger number as the work is overtaken. Each centre established will cost the City $1200.00 per year for supplies and half time service. This is the whole story: education and prevention cost less than reformation and cure, and the results are infinitely better. These children cannot obtain dental treatment. Social conditions are such that the parents cannot pay for it, and children with weakened, crippled, and diseased bodies, stunted growth, undeveloped mentality, depraved morals, and criminal tendencies are the result. The child becomes the man who robs his fellows, preys on humanity, and fills the prisons, because he never had a chance. It is not only sound economy, but the highest type of christainity to save these children for useful citizenship. "Suffer little children to come unto Me". These children are under your care. The Board in the past has nobly responded to the call of duty to the child along many lines. This is essential to life, happiness, and efficiency.

The larger scheme in view will not be lost sight of, and the hope that this beginning of four clinics is to be increased to ten or twelve in 1914 is about to be realized. If in 1915 this can be increased to twenty clinics the Board will have placed this City among the foremost of the world in its intelligent and broad policy of the dental care and supervision of its school children. Although school dental clinics have been established in America and Europe for some time, this City was one of the first to recognize the great advantages of establishing these dental clinics in the schools. It was said by those who opposed this policy that the clinic would be a disturbance to the school. This fear has been proven unfounded. On the other hand the control of the clinic in the school has been much better and easier. There has been less trouble with the children. They have seen their comrades in the chair: they are familiar with it: they feel the controlling influence of school discipline about them: they feel confidence in the school teacher, nurse, and dentist,

which gives them courage : there is no unwise tenderness or interference of the mother who is often more afraid of the dental chair than the child. If for any reason those children down for treatment are detained from school, their places can be very quickly filled by others in the classes, with no delay or loss of time to the clinic. Dr. Doherty has worked assiduously to get these clinics in good working order under many difficulties and discouragements. He has proved himself a very capable and worthy officer. In his report, which is appended, you will find details of the work accomplished this year.

During the past year 8,391 of the hutax tooth brushes and 11,780 tubes of tooth paste were distributed to the children of the poor at the nominal cost of 10c each.

Analysis of the School Nurses reports show that they have made 748,242 inspections of school children, 29,541 visits to the homes, 103 visits to dental clinics, 187 visits to dispensaries and hospitals, and 359 miscellaneous visits. They have given 39,970 treatments for minor ailments, and 175,104 instructions in care of person and personal hygiene. There have been 171 consultations with parents at the school. I would like to see this very much increased. The closer we can get the mother in touch with the school supervision the better will be the results and the greater harmony. 624 children were fitted with glasses, and 106 others were refitted; 179 children had adenoids removed, 342 had tonsils removed, and 1,036 others had both tonsils and adenoids removed ; 3,972 children had teeth filled and no extractions, while 1,222 others not only had teeth filled but also had some extractions; 967 had extractions only; altogether 34, 830 children with disease or physical defect were cared for. The nurses made 17,497 school visits.

Analysis of the Medical Inspectors reports show that they have made 983 home visits, and 13,110 school visits ; that they have made 53,776 special inspections of school

children apart from the routine inspections at mid-summer, Christmas, and Easter; 6373 children were specially examined for physical defects, and 11,431 defects, there were 3,065 with carious teeth only ; 21,136 children were given a complete physical examination, out of whom 5,520 were found to be normal having no physical defects, and 1,172 children were found to have had their physical defects remedied ; 8,382 children had carious teeth only, and were without other physical defects ; total defects were 25,098 ; 10,053 parents were notified of defects ; there were 701 consultations with parents at the schools besides the home visits ; 558 cultures were taken in cases of suspected diphthera ; the detailed report appended will give the different diseases and physical defects found; 2,320 children were excluded from school for contagious disease. Some of the defects were 1,899 children with defective vision, 752 with eye disease, 298 with defective hearing, 149 with ear disease, 3,359 with defective nasal breathing, 48 with lung disease, 83 with heart disease, 32 with chorea, 120 with defective orthopedic defect, 44 with defective palate, and 2,502 with skin disease.

At the beginning of the present year Trustee Fairbairn brought forward again the project of organizing Little Mothers' Leagues, and the Board made an appropriation for a beginning in this work. Early in March Miss L. L. Rogers, Superintendent of Nurses organized classes in McCaul, Hester Howe, Victoria, and Sackville schools. Girls from the Sr. 3rd, Jr. 4th, and Sr. 4th grades were admitted to these classes, and took up the work with great enthusiasm. Each school was supplied with a cot, bath tub, basins, table, and other necessary equipment for the teaching of Infant Care. Girls brought their baby sisters to be bathed, dressed, fed, and put to bed so that the instruction was made as practical as possible. A series of lessons were drawn up for a regular and systematic course of instruction, emphasizing the importance of cleanliness in everything done for the baby, and especially in the preparation of its food, if a bottle fed baby. The girls were also instructed how

* On Duty 6 Months. † On Duty 7 Months.

to make the different articles of clothing for a young baby, the proper food for a baby at different ages, the importance of regular hours of sleep, of feeding, and of care. The lessons taught by the school nurses to these girls are the practical lessons of personal hygiene, and the truths inculcated are broad enough and sufficiently far reaching to apply to the "Little Mothers" themselves. In this way essential lessons in personal care are being taught to parents in the homes so that the results should be greatly beneficial, not only in saving many infants lives, but materially reducing the prevalence of disease. In the year 1914 I hope many more of these classes may be organized. A great effort should be made to get the real mothers present, to get all the mothers and babies in the school district present so that these mothers who have never had any instruction in the care of a baby may have informal talks with the school doctor and school nurse. This would give not only opportunities for instruction, but also opportunities for warning. We know that parents from want of knowledge frequently neglect ailments that seem trifling to them, only to realize when too late that the "trifling ailment" means blindness, life-long deformity, or disfigurement, or even death to their child. Much anxiety and many serious conditions might be avoided by a timely warning, and I think these classes could be used for such clinics. Pregnant mothers too could get advice and warning, and this help would be of the greatest assistance to those whose finances are limited. So frequently advice is not sought because of the cost, or the long distance to a hospital. In this way too the school nurse would be brought much more intimately in touch with the homes.

On June 3rd, 1913, Miss L. L. Rogers sent in her resignation as Superintendent of Nurses, and in September Miss E. M. Paul was appointed to fill the vacancy.

Respectfully submitted,

W. E. STRUTHERS,
Chief Medical Inspector.

To the Chief Medical Inspector, Board of Education:

Sir,—I have the honor to present the Fourth Annual Report of the School Nursing Staff.

During the year the following nurses have resigned :— Misses A. B. Hill, A. McQuhae, K. Panton, A. M. Stirling, E. Burnett, I. P. Courtice, I. Fergusson, H. A Shipley, N. Hatch, and Mrs. E. M. Feeny.

To take the place of those resigned, and to add to our number the following have been appointed during the year:— Misses A. Armstrong, F. M. Chandler, W. Murray, E. F. Kerrigan, E. G. Russell, F. Scripture, V. G. Donaghue, J. G. Glass, A. B. Hill, G. K. Kelly, A. McQuhae, M. Misner, W. Robinson, L. A. Spry, H. A. Shipley, R. B. Skitch, A. M. Stirling, M. A. Thompson, E. F. Beal, I. P. Courtice, H. Denison, I. Fergusson, M. Atmore, J. Johnston.

67 applications were received for the position of School Nurse.

The one-month's Post Graduate Course was attended by 20 nurses who came from various cities, from Toronto, 8, Ottawa, 2, Owen Sound, 1, Paisley, 1, New Westminister, 1, London, 2, New York, 1, Woodstock, 2, Regina, 1, Richmond, Va., 1.

Constant vigilance on the part of the nurses has brought it about that it is the usual and not the unusual thing to find clean teeth and clean mouths among school children, 8,391 tooth brushes and 11,780 tubes of tooth paste were sold at a nominal price to school children during the year, 235 cases of suspected Tnberculosis were sent to the chest clinics in the hospitals, and as a result the cases, incipient or advanced, have been treated as each case demanded. Open cases were sent to Weston, a large number to the Preventorium, and advice given to mothers of those who might still remain at home.

Of the many children whose eyes were tested during the year 41 were unable to pay for the glasses which were needed. These were at once provided and expense borne by the Board of Education.

Real progress is made in any organization only when the work is carried on with the future definitely in view. If better conditions are to exist in the school five or ten years hence we must begin to create those conditions now. This is one of the motives prompting the hope of the increasing of the "Little Mothers' Classes" next year. This branch of our work, already has had gratifying results. In 4 schools our nurses are conducting these classes in rooms equipped with bath-tub, hospital cot, weighing machine, etc. Little girls gather around and receive practical instruction in the care of infants. By actual experience they learn how to wash, clothe, and feed the baby properly, and what is equally important they learn to detect ill-health. By having the information imparted in an attractive way it becomes no longer a mechanical or disagreeable thing but an intelligent piece of work to help with the babies in their homes.

We believe that when the time comes for these infants to enter school they will have healthier bodies, because they have been intelligently cared for. But this is not all, looking at the work from a still broader point of view, will not the next generation, the children born to these "Little Mothers", be stronger and better in every way for the early training now being given in our Public Schools? May not this be one factor in producing a higher type of citizen than now exists in our City?

We plan that during the summer these "Little Mothers" will hold themselves responsible for the infants in their own homes and districts to the extent of reporting needy cases, or directing mothers to a dispensary or milk depot where advice and assistance may be secured. Thus will they prove the immediate value of their training by becoming expert sentinels, watching over the health of the infants of our City.

I hope that in the near future the citizens of Toronto may value the instructions given in these classes so highly that the "care of babies" may be placed on the regular curriculum of school studies. It is difficult to estimate the value of having mothers bring their babies to these classes where all defects are noticed and remedied before the child has a chance to suffer.

In addition to their regular duties the nurses have done excellent work in relieving the poverty and distress caused by the hard times this year. Whenever they found children were absent from school because they lacked food or clothing, our nurses secured what was necessary. Principals of Schools in the poor districts have noticed that the attendance kept up remarkably well.

Respectfully submitted,

E. M. PAUL,

Sup't School Nurses.

To the Chief Medical Inspector, Board of Education, Toronto.

Dear Sir,—I beg to report as follows upon the results of Dental Inspection and School Dental Clinics for the year 1913.

During the year the first School Dental Clinics were opened. These are located in Annette Street, Roden, Earlscourt, and Queen Alexandra Schools. The first two were in operation for six full months, and the last two for three months.

The following is a statement of the results accomplished in these clinics:—

Number of children relieved of toothache	485
" " " having teeth cleaned	611
" " fillings	2912
" " hopelessly diseased teeth extracted	1698
" " operations performed	7348
" " children who received complete dental treatment	556

During the year, also, 1200 public school children received complete dental treatment at the Municipal Dental Clinic.

As a result of the home visits of the nurses many more children are visiting the family dentist, with the result that a great number of teeth are being saved that previously were lost.

The preventive aspect of the work is increasing in effectiveness each year. The number of children taking regular care of the teeth and the general improvement in the health and cleanliness of the mouths of the children are two of the most gratifying features of the work.

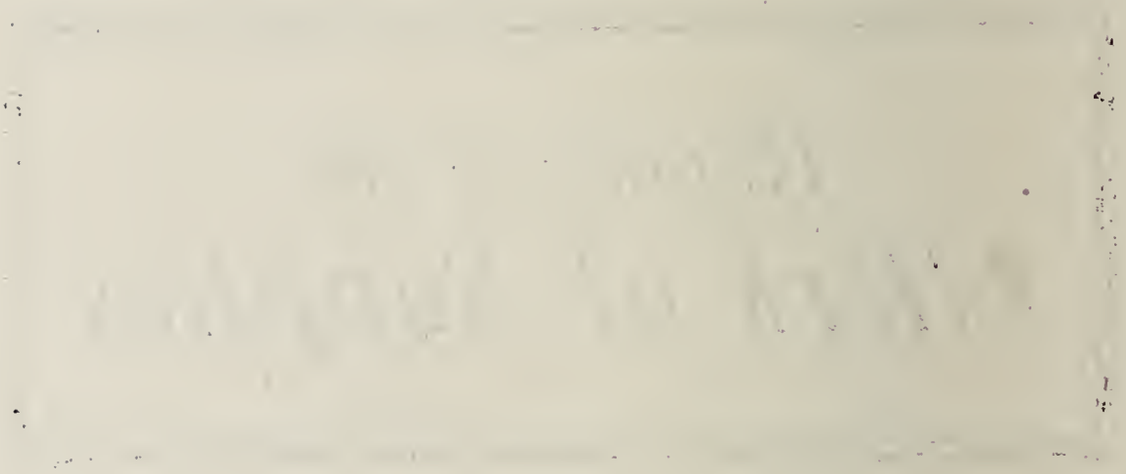

The year 1913 is the first year in which the department has had any definite means of obtaining treatment. The results have been most satisfactory, and, with the increased efficiency which may be expected as the system develops, will be more so.

Respectfully submitted,

W. H. DOHERTY,

Dental Inspector.

Report of the Clerk of Supplies

REPORT OF THE CLERK OF SUPPLIES.

To the Chairman and Members of the Board of Education :

I have the honor to submit the following report in regard to Text Books and Supplies furnished by the Board of Education for the year 1913.

The following school supplies were furnished to the pupils free : Text Books, Work Books, Note, Exercise, Dictation and Writing Books, Drawing and Practice Paper, Lead Pencils, Slates and Slate Pencils, Chalk, Pens, Penholders, Envelopes, Inks, Paints, Brushes, Colored Crayons, Pastel Crayons, Crayograph, Charcoal for Art Work, Bookkeeping Blanks, Business Forms, Shorthand Text Books, and Note Books, Typewriting Supplies, etc., for use in the Commercial Classes.

The classes in which sewing is taught were furnished with Needles, Thread (both silk and cotton), Braid, Canvas, Prints, Ginghams, Lawn, bleached and unbleached Cotton, Damask, Dress Goods, etc.

There are seventy-two Kindergartens in our schools, each having a large attendance, all of which are supplied with the many supplies used in the Kindergarten work.

There are twelve Manual Training centres, each of which receives a large quantity of Lumber, special Drawing Paper, Pencils, Hardware, Stains, Oils, Varnish, Tools, etc.

There are twelve Domestic Science centres, where cooking is taught. Each of these receives large quantities of Groceries, Meats, Vegetables, Cereals and all such supplies that are used in teaching this subject.

Playground Schools were open during the months of July and August, each furnished with a supply of Sand, Pails, Trowels, Scoops, Quoits, Base Balls, Basket and Foot Balls, and other apparatus for games, etc., necessary for the exercises carried on in these schools.

One Vacation School, open during July and August, received supplies of Wool, Needles, Raffia, Canvas, Special Paper and other sewing material. These were used by the children in making many useful articles for themselves.

The following materials for the Medical Department were supplied: Vaseline, Absorbent Cotton, Boracic Powder, Bandages (assorted sizes,) Tincture of Green Soap, Rolls of Adhesive Plaster, Collodion, Bi-Chlorate Tablets, Sulphur Ointment, Zinc Oxide, Tr. Iodine, White Precipitate, Formalin, Castile Soap, Paper Towels, etc. These are for the use of the Medical Inspectors and Nurses; they amount to a very large item in the year.

In connection with the Medical Department is the Forest Open Air School, situated in Victoria Park. This school receives the regular school supplies. Each pupil is furnished with a cot, pair of blankets, two pillows, also cover for each bed for protection from the rain. The school has a fully equipped kitchen and dining room, where the pupils in attendance receive three meals each day. A large quantity of Milk, Bread, Groceries, Meats, Vegetables, Fruit, Ice, etc., including Fuel, is supplied to this school. The attendance numbers about 100.

There are ten Dental Clinics connected with the schools that receive all the necessary supplies required for carrying on this work.

Twenty Night Schools were opened in the Public Schools for six months during the year. In nine of these Manual Training and Domestic Science Classes were held. All these schools received supplies of various kinds necessary for their work.

In addition to the above, the Central Technical School has three Branch Night Schools in different parts of the city. The High School of Commerce also has three Branch Night Schools. These Night Schools receive the necessary

supplies of various kinds. Night Schools were also held in Jarvis Street, Harbord Street and North Toronto Collegiates.

The Central Technical School, which teaches a variety of subjects, requires an ever-increasing and varied quantity of supplies for teaching Art, Science and Physics. Mechanical and Industrial Instruction is given and material is supplied for these, including considerable machinery that has been added recently.

The High School of Commerce, Collegiate Institutes and High Schools receive general School Supplies, and a large quantity of Apparatus and Chemicals for Science work.

Caretakers of all schools receive large quantities of Floor Oil and other material for cleaning, also Tools, Hardware, Mowers, Hose, and other supplies.

As the schools are increasing so rapidly in size and number as well, and no doubt will continue to do so. it is very necessary that each school should have a separate room in which to keep supplies; it should be of sufficient size to hold supplies required for three or six months. If greater quantities could be delivered to the schools it would mean fewer deliveries. This plan will have to be adopted or the staff of the Shipping and Delivery Department will have to be very materially increased. In connection with this let me again emphasize that this room should be on the ground floor, or in the basement, and not on the second and third floors, as many of them are at present. It is a great loss of time for a man to carry parcels to the second or third storey of a school building. Besides, it means keeping a truck standing an unusually long time, when if he could throw the goods off on the ground floor he could deliver to three schools in less time than one under these conditions. Several Manual Training and Domestic Science rooms are situated on the second or third floors, and the dealers furnishing supplies refuse to deliver them to any place but on the ground floor. The carrying of lumber in full board lengths—and

much of it is this size—or in any lengths, up stairs is very heavy work. If it were not for tne teachers of these classes getting their boys to bring it up, we would be in an awkward position many times, as the lumber dealers cannot get the teamsters to deliver to any place but on the ground floor. This is something I think should be remedied.

In addition to the above, the following are supplied and under control of this department: Flags, Fire Extinguishers, Pianos, Office Supplies, Printing, Window Shades, Gymnasium Apparatus, Express Work, Gas, Water, Electric Light and Power, Telephones, etc., 23,361 Flowering Plants, 1,616 Shrubs, 20,929 Bulbs, a large quantity of Grass Seed, and several loads of Black Loam Manure and Fertilizer were supplied to the schools. Many of the schools did not receive any plants owing to the building operations going on and their grounds not being ready.

This Department made and delivered to the schools during the year 886 gallons of ink at an estimated cost of 25c. per gallon.

All accounts for supplies under the control of this department are checked and duplicates made out in this office and certified to for the Advisory Industrial, Advisory Commercial, and the Management Committees of the Board.

Fuel—The supplying of fuel to such a large number of buildings is becoming a greater problem each year, not only in regard to the cost, which seems to be advancing annually, but also in the quantity used. In many of our schools night classes are conducted and meetings of various kinds are held at night. These schools are required to be heated until ten o'clock, and in some cases much later. Gas, electric light and power for ventilation purposes are supplied, also the water has to be kept running continuously in the wash rooms until the buildings are closed. The automatic self-acting flush tanks use a large quantity of water, as no doubt the school buildings will continue to

be used at nights and the cost for water, fuel and electricity must necessarily increase. Many of the schools require from 150 to 270 tons of coal (as well as a large quantity of wood required for lighting the fires.) As the storing capacity for fuel in the basements is limited to only a part of what is required for the year, I think it would be well to consider the advisability of constructing fuel areas of sufficient size to hold the year's fuel. These should be underground immediately outside of the school buildings and of easy access to the boiler rooms. These could be extended any distance desired and would not curtail a foot from the playgrounds. These areas could be lighted from the top with prism glass and have a covered opening for receiving coal. There would be many advantages in having fuel areas so situated; delivery could be made at any time without dust being driven throughout the building, as they could have a tightly closed door at the opening into the boiler room. It would also do away with having to wait until a building under reconstruction is completed before delivery can be made. This trouble is met with quite frequently.

There would be no cost to the Board beyond that of construction, as they would be on the property belonging to the Board. If the heating plants in the schools were constructed so that they would burn screenings, I believe a large saving could be effected in the cost of coal.

The cost of Text Books and other supplies purchased during the year was as follows:

Public Schools

Text Books, $10,816.88; School Supplies, $11,995.07 Blank Books, $12,823.68; Supplementary Readers, $1,580.95 Kindergarten Supplies, $6.895.69; Drawing Material, $3,485.41; Manual Training Supplies, $4,546.46; Domestic Science Supplies, $3,758.92; Commercial Supplies, Typewriters, etc., $1,226.90; Medical Inspection Supplies, $1,807.55; Wall Maps, Globes and Apparatus, $1,174.33;

Sundry and Office Supplies, $3,743.43; Caretaker's Supplies, Hardware, etc., 3,267.97. Amount received from sale of books, old paper, etc., $515.30. Estimated value of stock on hand in storeroom at end of the year, $15,506.48.

FREE TEXT BOOKS

The total cost of Free Text Books issued in 1913 was $10,960.22. Of the amount $143.34 were returned for the text books sold, leaving a balance of $10,816.88 as the cost of Free Text Books during the year. In nearly every school the books have been preserved with great care.

The total cost of supplies, including work books, exercise books, book-keeping blanks, note books, dictation books, business forms, drawing materials, writing books, slates and rulers was $17,649.22. $371.96 were received for supplies during the year, leaving the net cost of supplies $17,277.26.

The cost per pupil for text books on the basis of total enrollment, omitting Kindergarten pupils, was 19¾ cents. This is larger than usual, because so many new books had to be purchased, which have been recently authorized by the Education Department.

The cost per pupil for text books on the basis of average monthly attendance, omitting Kindergarten pupils, was 23½ cents.

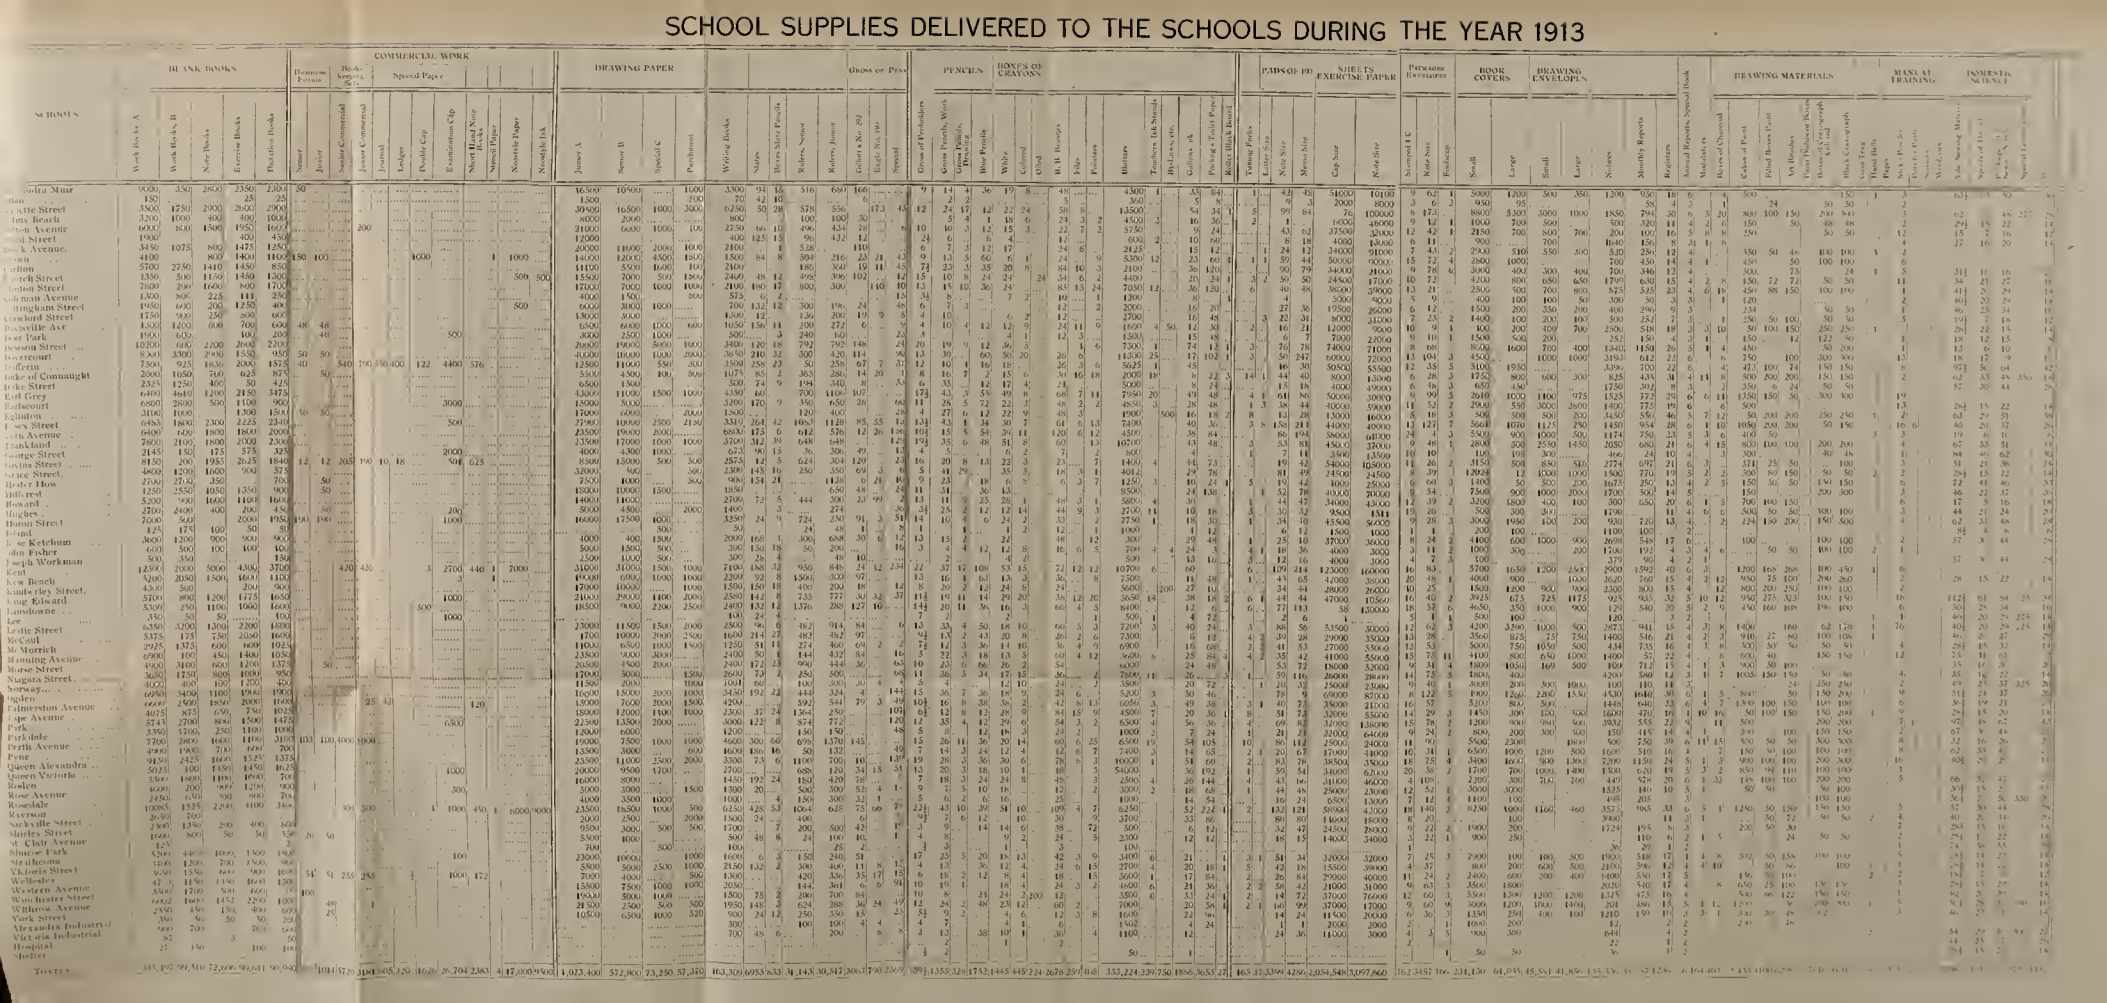

The cost per pupil for supplies on the basis of total enrollment, omitting Kindergarten pupils, was 31¼ cents.

The cost per pupil for supplies on the basis of average monthly attendance omitting Kindergarten pupils, was 37¼ cents.

The cost per pupil for both text books and supplies on the basis of average monthly attendance, omitting Kindergarten pupils, was 61½ cents.

The cost per pupil for text books, supplies and Kinder-

SCHOOL SUPPLIES DELIVERED TO THE SCHOOLS DURING THE YEAR 1913

TEXT BOOKS SUPPLIED DURING THE YEAR 1913

Hard Coal (grate), per ton - $6.00	Hardwood, per cord $8.90
Hard Coal (egg, stove or nut) $6.10	Pinewood, per cord $7.40
Soft Coal (Pocahontas Lump) $7.35	Slabs, 4 ft., per cord $5.40
Soft Coal (Straitsville Lump) $6.60	Slabs, 2 ft., per cord $5.90

Supt. of Buildings' Annual Report

PART II.

SUPERINTENDENT OF BUILDINGS' ANNUAL REPORT

To The Chairman and Members of
The Board of Education

In compliance with Clause 2, Section 78, By-Laws and Regulations of the Board, I have the honor of herewith respectfully submitting my Tenth Annual Report.

C. H. BISHOP,
Supt. of Buildings

STATISTICS

The following condensed extracts from statistics will give information not to be found elsewhere except at considerable labor of searching through the different schedules.

For greater convenience in looking up details of information contained in the Schedules appended, reference may be had to the index at the end of this report.

HEIGHT OF BUILDINGS

High Schools

FIVE BUILDINGS TWO STOREY

Jarvis Street Collegiate Institute, Malvern Collegiate Institute, North Toronto High School, Oakwood Collegiate Institute and Riverdale Collegiate Institute.

FOUR BUILDINGS, PART TWO STOREYS AND PART THREE STOREYS

High School of Commerce, Harbord Collegiate Institute, Humberside Collegiate Institute and Parkdale Collegiate Institute.

ONE BUILDING, FOUR STOREYS

Technical High School.

Public Schools

ONE BUILDING, ONE STOREY

Island.

THIRTY-SEVEN BUILDINGS, TWO STOREYS

Allan, Balmy Beach, Bedford Park, Brock Ave., Brown, Carlton, Coleman Ave., Cottingham St., Crawford St., Davisville, Deer Park, Eglinton, Duke St., George St., Hillcrest, Howard, John Fisher, Joseph Workman, Kew Beach, Lee, Leslie St., McMurrich, Niagara St., Norway, Pape Ave., Pyne, Roden, Rose Ave., Rosedale, Sackville St., Shirely St., Strathcona, St. Clair Ave., Wellesley, Western Ave., Withrow Ave. and York St.

SEVEN BUILDINGS PART TWO STOREYS AND PART THREE STOREYS

Earlscourt, Essex St., Givins St., Jesse Ketchum, Kimberley, Park and Victoria St.

THIRTY-ONE BUILDINGS, THREE STOREYS

Alexander Muir, Annette St., Bolton Ave., Brant St., Church St., Clinton St., Dewson St., Dovercourt, Duke of Connaught, Dufferin, Earl Grey, Fern Ave., Frankland, Grace Street, Hester How, Hughes, Huron St., Kent, King Edward, Lansdowne, McCaul, Manning Ave., Morse St., Ogden, Palmerston Ave., Parkdale, Perth Ave., Queen Alexandra, Queen Victoria, Ryerson, Winchester St.

METHOD OF HEATING

High Schools

SEVEN BUILDINGS HEATED BY STEAM

Technical High School, Humberside Collegiate Institute, Jarvis St. Collegiate Institute, Malvern Ave. Collegiate Institute, North Toronto High School, Oakwood Collegiate Institute, Riverdale Collegiate Institute.

TWO BUILDINGS HEATED PARTLY BY STEAM AND PARTLY BY WARM AIR FURNACES

Harbord St. and Parkdale Collegiate Institutes.

ONE BUILDING HEATED BY WARM AIR FURNACE

High School of Commerce.

Public Schools

THIRTY-FIVE BUILDINGS HEATED BY STEAM

Annette St., Bedford Park, Bolton Ave., Brown, Carlton, Clinton St., Davisville, Dufferin, Duke of Connaught, Earl Grey, Earlscourt, Eglinton, Frankland, Hester How, Hughes, John Fisher, Kent, Kimberley, King Edward,

Lansdowne, Manning Ave., McMurrich, Norway, Ogden, Pape Ave., Parkdale, Pyne, Queen Alexandra, Roden, Ryerson, Strathcona, Victoria St., Wellesley, Winchester St. and York St.

FOUR BUILDINGS HEATED PARTLY BY STEAM AND PARTY BY WARM AIR FURNACES

Balmy Beach, Dewson St. Essex St. and Perth Ave.

THIRTY-SEVEN BUILDINGS HEATED BY WARM AIR FURNACES

Alexander Muir, Allan, Brant St., Brock Ave., Church St., Coleman Ave., Cottingham St., Crawford St., Deer Park, Dovercourt, Duke St., Fern Ave., George St., Givins St., Grace St., Hillcrest, Howard, Huron St., Island, Jesse Ketchum, Joseph Workman, Kew Beach, Lee, Leslie St., McCaul, Morse St., Niagara St., Palmerston Ave., Park, Queen Victoria, Rose Ave., Rosedale, Sackville St., Shirley St., St. Clair Ave., Western Ave., Withrow Ave.

MANNUAL TRAINING ROOMS

Twelve heated by steam—Annette St., Brown, Dewson St., Kent, Kimberley, Lansdowne, Manning Ave., Oakwood, Parkdale, Perth Ave., Queen Alexandra and Wellesley.

One heated by furnace—Pembroke St.

DOMESTC SCIENCE ROOMS

Twelve heated by steam—Annette St., Brown, Dewson St., Kent, Kimberley, King Edward, Manning Ave., Oakwood, Parkdale, Perth Ave., Queen Alexandra, Winchester St. and Wellesley Schools.
